TRADE ITEMS.

Col. H. C. Chambers of J. M. Man's & Co. is in the city for a few days.

W. H. Schieffelin & Co. have secured judgment for $100 against Marcus Neustadter.

The patent right in vanillin heretofore enjoyed by De Laire & Co. in this country has expired.

Mr. Charles Hubbard of Charles Hubbard, Son & Co. of Syracuse, N. Y., was in town last Wednesday.

The Evansville Drug Co. at Evansville, Ind., has been incorporated witn a capital stock of $50,000.

W. A. Robinson & Co., New Bedford, Mass., have sent out a very net calendar embellished with a chromo of a handsome and intelligent looking setter dog.

George Hughes, Charles F. Warrnier and Ewell Jamison have incorporated the George Hughes Drug Co. at Jacksonville, Fla., with a capital stock of $10,000.

The Kinyon-Young Drug Co. has been incorporated at Ottawa, Iowa, with a capital of $100,000, by Ira A. Myers, W. G. Jordan, L. H. Young and C. P. Kinyon.

The annual meeting of the stockholders of the National Starch Manufacturing Company will be held on Feb. 6. Transfer books close Jan. 17 and reopen Feb. 11.

ALCOHOL DEMORALIZED.

The last report of the Whisky Trust to its stockholders, proposing several plans of reorganization, has had very few responses, which President Greenhut interprets as a desire to allow the present management to continue until the annual meeting in April. In the mean time the first proposal to form a stockholders' protective committee, which appeared in the form of a circular letter, issued by a concern on the "street," seems to have obtained few, if any, supporters, as it is a generally accepted fact that it emanated from Mr. Greenhut and was one of his schemes for continuing in control of the Trust. The movement, which was mentioned briefly in our last, however, has gained the confidence of the stockholders, as it originated with many of the largest of them, the names of the gentlemen at the head of it being a sufficient guarantee of its genuineness and of a firm intention to protect their interests, which have been jeopardized by the gross mismanagement of the property under Mr. Greenhut and his associates. They reason that the property is a valuable one, if properly managed, and they intend to oust the stockjobbers now in control as soon as they can secure sufficient stock to effect their purpose. Already, we are assured, they represent very large interests, and some interesting developments are looked for in the near future.

Our readers are familiar, through the columns of The Reporter, with the various moves in the history of the trust under Mr. Greenhut and his associates, nearly, if not all, of which were for stock-jobbing purposes and which brought the Trust to the position it occupies to-day. Last Summer, when the tax on spirits was increased 20 cents a proof gallon the Trust could have netted a large profit on its holdings, but its president's well-known stockjobbing propensities had so destroyed all confidence in the concern he could not raise the money necessary to taxpay their holdings, although a certain amount of spirits was tax-paid and marketed at a profit. The independents tax-paid their spirits, and promptly started up to supply a demand for new goods. The Trust was simply compelled to remain idle until its enormous stock of old spirits was marketed, for which, however, there was practically no inquiry. It was the old story of overproduction, with the odds in favor of the Trust, had it but been in a position to take advantage of its opportunity. As a natural sequence came the abolition of the rebate voucher system, when the Trust found its trade slipping away. Then the trouble with its distributers came to the surface, though it had been brewing for some time. Although there is a ten-years' contract between the Trust and the American Distributing Company, the latter concern found it necessary to look elsewhere for new goods, which the Trust could not supply, and it is to-day in the distilling business on its own account, through the purchase of the distillery at Terre Haute, Ind. The loss of the support of the Distributing Company following so closely on the abolition of the rebate voucher system, which Mr. Greenhut admitted deprived the Trust of its working capital, was the severest blow the Trust could have received. Hence the call for $1,000,000, with which to distribute its goods in the Eastern territory. But the Trust management could not afford to await possible action by the stockholders on the plans of reorganization submitted, as the enormous stock of old spirits was constantly staring them in the face and must be converted into cash as soon as possible. Something had to be done, and that promptly, so a representative for the Trust was found in the person of a gentleman who has been with the Trust and independents alternately, but who, withal, has always been a protege of Mr. Greenhut. The trade was lately informed by circular that he had been added to the list of the Trust's distributers; at the same time he was given carte blanche to sell at any price he chose, no matter what the American Distributing Company, the Trust's "official" distributers, quoted. In a word, he is the personal representative of Mr. Greenhut, and it is generally understood that he is to be used as a club against the Distributing Company and is to endeavor to market the old goods of the Trust at any cost. That he is making a good start is evidenced by the quotation sent out on Wednesday of two dollars and thirty-one cents for alcohol in ten barrel lots. Some of the independent distillers refuse to meet this quotation, preferring to stand aside and await the outcome of the fight, which is now unquestionably between the Trust and its "official" distributers in the East.

Looking into the future, it is very probable that lower prices for alcohol will prevail for some time. The outcome of the fight will be awaited with considerable interest, but it is more than likely that the American Distributing Company will win, owing to its knowledge of the trade, the fact that it is now its own distiller and the large resources at its command.

Events in distilling circles undoubtedly point to consolidation of some sort in the future. We suggested in our editorial in The Reporter of December 31 that the Distributing Company secure control of the Trust. Certain contingencies might arise to bring this about, such as a reorganization of the Trust by the committee of stockholders eliminating the present management. Another plan suggested to bring stability to prices is practically a consolidation of the best-equipped distilleries, both inside and outside of the Trust, working in harmony with the American Distributing Company and the Western Company, thus controlling the trade of the country, the price being put so low as to prevent competition from those distillers who were not taken into consideration. A profit of one and a half or two cents per gallon to the jobber was proposed. The objection offered to this plan is that outside distillers would be glad to offer their product at cost, or even less than cost, providing they could obtain six cents, or even four cents, per gallon for their slop. To our minds, the solution of the question is to be found in a consolidation—if there must be one—which will make the distributers their own distillers.

THE NAPHTHALINE WAR.

A very interesting situation has developed in naphthaline within a short time. Its principal use is as a substitute for camphor for preserving clothing from the destructiveness of the moth. The annual consumption in the United States is said to be about one thousand tons, and there is practically but one maker who has controlled the market for the past two years under a contract with the largest, if not the sole, English maker, whose output is stated to be about four hundred tons per annum, most of which comes to this country.

There is a Belgian maker who produces about one hundred tons per annum, and there are some German makers whose product is comparatively small in quantity, though said to be of very superior quality. The contract between the American and the English manufacturers was drawn for three years, but the former now claims, so it is stated, the latter has violated the agreement and shipped to other parties. Not to be trifled with, the American maker has formally declared the contract void and has inaugurated a war of prices, which is apt, from present indications, to last for some time. Already it is claimed that goods are being sold below the cost of production. The American is bound to hold this market, and is offering to make contracts, with protection against a decline. This ought to have the effect of placing all of the business in his hands. In the meantime the representatives of the German makers are holding aloof from the market, preferring not to sell at a loss. While it is hardly probable that materially lower prices will increase its use as a substitute for camphor, it is barely possible that the consumption in other directions may show a substantial increase.

NITRATE OF SODA.

The statistical position of nitrate of soda at the close of last year shows marked change, and the prospects for a plentiful supply during the earlier months of the present year are assured. The inference is, that notwithstanding the demand is most active during this time, there is little danger of prices becoming unreasonably high or that the trade will experience a repetition of the conditions that prevailed during the earlier months of last year. There was a gradual decrease in stocks during the first four months of 1894, which threatened to result in actual scarcity before the close of the first half of the year, and as a result the market values increased to a point which, in turn, checked consumption. The higher prices also stimulated importations and a gradual retrograde movement in prices was the result. Later, as the sailings from the West Coast increased and additional charters were constantly announced, the effect was further depressing, and increasing stocks made the outlook for importers highly unsatisfactory.

The stock on hand at the opening of the year differed but little from that of a year ago, but the cargoes now on the way and due to arrive at Atlantic ports up to April 1, make the visible supply to that date about 300,000 bags, while for the same period in 1894 the visible supply was only 160,000 bags. The average consumption amounts to about 60,000 bags per month, though during the first three months of the past two years the deliveries for consumption did not average above 48,000 bags, and, allowing 50,000 bags as the probable monthly deliveries during January, February and March, there will be a supply in store on the first of April next of over 150,000 bags, an increase in spot stocks of over 80,000 bags over the spot supply on the incoming of the present year.

THE GAMBIER MARKET.

The general depression in business has not had as much influence upon dyestuffs as upon most other commodities entering into the articles of general consumption, and it seems to have had less influence upon the consumption of gambier than upon other goods used by the dyer. Changes in styles are responsible in a large measure for this, but there is another cause for the demand, and that is the increased activity in the morocco leather trade of late, in which branch of industry gambier is an important raw material. Hence we find that during the four months ending December 31 the deliveries of gambier for consumption aggregated 29,305 bales, a very fair average, and much better than might have been expected were this trade to be measured by the results in other departments of business during that period.

It would naturally follow that with such a satisfactory demand the gambier market should present a firm appearance, but the contrary is the case, and again we turn to the statistics to ascertain the cause. We find that for the coming four months we have a visible supply of 46,477 bales, or over 15,000 bales more than was consumed in the last four months of 1893, and that there is no reasonable prospect that there will be a demand large enough to take care of all this stock. It is not surprising, therefore, that the tone of the market should be weak at present, but it would be surprising if prices did not decline to a considerable extent between the present time and May 1 next.

The calendar of public sales in London for 1895 has been made public, the days set apart for drugs, etc., being as follows: Cocoa sales, every Tuesday; spice sales, every Wednesday; cinnamon, Feb. 25, May 27, Aug. 26 and Nov. 25; shellac, every Tuesday; drugs, every alternate Thursday; gum arabic, every fourth Thursday; varnish, etc., every fourth Thursday; East India indigo, Jan. 28, April 8, July 8, Oct. 7; Guatemala indigo, to follow E. I. sales; bristles, every alternate Thursday; tallow, oils, etc., every Friday; isinglass, Jan. 8, Feb. 19, March 19, April 19, May 28, June 25, July 30, Sept. 3, Oct. 1, Nov. 5, Dec. 3.

TRADE ITEMS.

L. S. Quackenbush has obtained judgment for $1,842, against the Jarbe Paint & Iron Manufacturing Company.

Mr. Walter H. Jewell of E. J. Hart & Co., New Orleans, has been in the city for a few days, making purchases for the firm.

Mr. W. S. Boyden, representing Herf & Frerichs of St. Louis, Mo., has returned to this city, after an absence of several weeks, most of his time having bene spent in the West.

T. W. Stemmler, Franklin A. Stemmler and Allen A. Still have organized the Ammonol Chemical Co., at Jersey City, N. J., with a capital of $100,000 to manufacture chemicals, etc.

The White Rose Manufacturing Company of Pawtucket, R. I., soap powder, has made an assignment. The business was started three years ago with a claimed paid-in capital of $50,000.

Messrs. Billings, King & Co., dry color, paint and varnish makers, this city, have issued their annual counting house calendar, and, like all the products of this house, it is "just the thing."

It is reported that Geo. R. Finlay, late of Finlay & Brunswig, New Orleans, is to become associated with Mr. F. A. Dicks & Co. of Natchez, Miss., in the wholesale drug business at New Orleans.

Mr. Paul Mausolff, of the Roesseler & Hasslacher Chemical Company, sailed for Havre on La Champagne Saturday. He goes on business and pleasure, and remains abroad about two months.

The John C. Lightbody Co. has been incorporated in Jersey City, N. J., with a capital of $100,000, to make printing inks, colors, varnishes, etc., by J. Lewis Leib, John L. Leib, Walter Cooper and Clarence Linn.

The Twyford Glass Company has been incorporated at Chicago with a capital of $20,000, to manufacture looking glass plates. The incorporators are Harry B. Twyford, Harry C. Furniss and Harry S. Weld.

The Carbon Paint Company of this city has been incorporated to manufacture waterproof and fireproof paints. Capital, $100,000. Directors, William Calhoun, Charles B. Hearn and Thomas D. Prentiss.

Mr. R. Daniel, one of the oldest and best known former members of the drug trade, was at the Drug Trade Club one day last week. Mr. Daniels is hale and hearty, despite his years, and still able to run up stairs.

In locating the American office of Bowman, Thompson & Co., limited, we inadvertently stated it was at 66 Broadway. It should have read 66 Broad street, where the Morris Building has been located since it was built.

A report from Madrid asserts that, as a result of the recent negotiations, a minimum tariff has been reaccorded to the United States by the Spanish Government upon exports from the United States into Cuba and Puerto Rico.

The American Lacquer Company has been incorporated at Cleveland, O., with a capital of $3,000, to manufacture lacquers and varnishes. Charles H. Gaylord, Charles E. Perkins, Nellie C. Perkins, Jas. Pelletieri and Hal. T. Perkins.

Mr. T. T. Brown, for several years with McKesson & Robbins, but now representing the Fleming whiskies of Pittsburg, in the States of New York, Connecticut and Vermont, has arrived in town, and proposes making this city his headquarters.

A very tasty counting-house calendar has been issued by the Welch, Holme, Clark Company, dealers in chemicals and soap greases. This firm is headquarters for soap makers' supplies, and this embossed cerulean calendar will prove a constant reminder of this fact.

The difficulties in the cultivation of black pepper in the West Indies have been successfully overcome in Trinidad, as we learn from a bulletin of the Royal Botanic Gardens. A crop of some 200 pounds has been harvested, and samples have received highly satisfactory valuation.

The overflow from a burning tank of oil in the warehouse of the Standard Oil Co., at Canton, Md., on the 6th inst., communicated the fire to the fertilizer works of Griffith & Boyd, causing a loss to this firm of $300,000. The fire also reached the acid works of G. H. & C. T. Davidson, entailing a further loss of $80,000.

The project to establish a large quinine factory in Java has entered upon an active phase. A company is said to be in course of formation and it is mentioned that 300,000f. have already been subscribed toward the capital. At a meeting of the Java Cinchona-planters' Association on Nov. 15, a detailed scheme was submitted.

On the 1st inst. the old firm of F. W. Braun & Co., Los Angeles, Cal., was dissolved by mutual consent, Mr. R. G. Finlay retiring from the firm. The business will be continued under the name of F. W. Braun & Co., the interest being equally represented between L. N. Brunswig, of New Orleans, and F. W. Braun, of Los Angeles, Cal.

From F. W. Brode & Co., brokers in cottonseed products, Memphis, Tenn., we have received "A Gentle Reminder" and "Happy Days." This is doubtless to remind all that dealing with this firm insures happy days, as square dealing is their stronghold, and the members of the firm are as popular as was doubtless the trio perched upon the river bank.

S. Winterbourne & Co. have opened business in London and New York as gum merchants, for the importation of the various grades of varnish gums. Mr. S. Winterbourne was for several years manager of the Walker Gum Co., and is thoroughly conversant with every detail of the business. Mr. A. Mason, lately with the Walker Gum Co., will represent the firm in this city. The New York office is at 99 Maiden lane, where buyers of gums will be sure to find just what they require.

Mr. L. N. Brunswig has become the sole owner of and successor to the wholesale drug house of Finlay & Brunswig, at New Orleans. The business was established by Wheelock, Finlay & Co., who were succeeded by R. G. Finlay & Co., and later by Finlay & Brunswig, who extended the business to large proportions. Mr. Brunswig has for a long time been identified with the drug trade of the South, and the success of this house is largely due to his business qualifications and energy.

Frederic E. Suse, broker, of this city, last week confessed judgment for $23,605 in favor of Clovis, Gaston & Fernand Floquet of St. Denis, France, on an old claim for fats and oils, which were shipped to him between July 12, 1884, and March 10, 1888. He was formerly an oil broker, but since September, 1893, has been in the foreign exchange business, when he became a partner in the firm of Pratt & Co. The judgment is against him individually, and, it is said, has nothing whatever to do with affairs of the firm.

The Columbus Distilling Company of Brooklyn elected on Tuesday Henry Clemenson president, in place of Henry D. Riggs; Robert S. Engle, vice-president, and E. M. Hedenberg, secretary and treasurer. The distillery works in close alliance with the American Distributing Co. The capacity of this distillery, together with that of the Woolsey distillery in Terre Haute, Ind., recently purchased by parties interested in the A. D. Co., is said to be about 45,000 gallons per day, which the American Distributing Co. handles.

On the 5th inst. the Wholesale Drug Trade Association completed the first half of the games in the bowling tournament. The score was as follows: First game—R. W. Robinson & Son, 724; Dodge & Olcott, 820. Second game—Lanman & Kemp, 708; Whitall, Tatum & Co., 719. Third game—R. W. Robinson & Son, 715; Whitall, Tatum & Co., 708. Fourth game—Parke, Davis & Co., 682; Merck & Co., 738. Fifth game—Parke, Da is & Co., 759; Lanman & Kemp, 711. Sixth game—Dodge & Olcott, 648; Merck & Co., 672.

C. H. O'Neil, Milwaukee, has associated himself with his brother, and organized the O'Neil Paint Company to carry on the oil and paint business in Milwaukee. They have determined to deal in the best class of goods only and have made connection with Harrison Bros. & Co., Philadelphia, selling their paints exclusively, and with the Globe Refining Company, Louisville, cottonseed oils. This speaks well for their judgment, and is evidence of their determination to sell only the best goods procurable.

The Knickerbocker Chemical Company, which was organized in 1889 as an association of acid manufacturers, and which has been an aggressive factor in the acid trade during the past five years, has now become an independent concern. Its capital has recently been increased to $20,000 in cash paid in, and it has purchased land and waterfront at Bridgeport, Ct., upon which has been erected an extensive storage depot and shipping station for New England points. It also maintains a branch depot at Waterbury, Ct. It is understood that the erection of similar stations at other points and a further increase of capital are contemplated during the coming year.

C. G. Bacon & Co., this city, wholesale druggists, manufacturing chemists and importers, have become agents for the suppositories manufactured by William E. Gibbs and formerly handled by Hall & Ruckel, and are prepared to supply the trade on favorable terms. They have also secured the sale of a large line of specialties and proprietaries, and, in fact, are prepared to supply the trade with anything in the drug line at bottom prices. This house is well known for its reliability and push. They solicit correspondence.

Mr. Frank L. Young, dealer in oils Boston, has taken into partnership Mr Frank W. Kimball, and the firm name is now Frank L. Young & Kimball. Mr. Kimball has been with the house for twelve years and is well known in the oil trade. Gen. Wm. F. Crofer continues as special partner in the firm The firm occupy a large six-story building on Purchase street, and has a factory and wharves at South Boston, which give them unexcelled facilities for handling oils at low cost. The factory occupies 28,000 square feet and their yard and wharf-room much more.

A further drop in the British revenue derived from medicine stamps has been recorded this year. In the year ending March 31, 1892, the high-water mark of the business was touched, according to the stamp statistics. The revenue from medicine stamps that year reached £240,062, representing 38,409,920 three-halfpenny stamps. The year following the revenue fell to £220,325, and in the year ending March 31, 1894, it had again declined to £213,210. The fall in the two years corresponded to a reduction of four and one-quarter millions of packets, reckoning these by 1½d. stamps.

There is an oil that is so susceptible to cold that it solidifies in a temperature that quickly melts ice. It is genuine grease from the crocodile of the Indus River and comes from the Punjab, its preparation being the chief industry of the Sarif tribe of Indians. There is no other oil that contains so large a proportion of solidifiable fat. It is a superior leather dressing and is in great demand in the Orient. The oil is taken from the tail exclusively, the tail of an average crocodile yielding from eight to ten gallons. The oil makes a good illuminant, and is highly prized as the base of liniments and ointments.

A deputy sheriff last week took charge of the New York office of the Scranton Glass Company, manufacturers of bottles and druggists' ware at Scranton, Pa., on an attachment for $1,162, in favor of Wing & Evans. A dispatch states that judgment notes for $40,000 have been entered against the company. The business was started in 1882 and incorporated in 1887, with a capital stock of $100,000, which was afterward increased to $150,000. J. H. Steel was president. The company has a large plant at Scranton, valued at over $125,000, and there is a bonded debt of $75,000. The assets have heretofore been inventoried at $350,000.

We have received from Mr. James W. Garson, New York representative of the house of Lewis Berger & Sons, limited, London, a most convenient and serviceable desk diary and calendar for 1895. The diary and calendar is an octavo book with illuminated cover, which gives ample space for memoranda, and the advertising matter is separate and unobtrusive. Accompanying this is a blotting pad, handsomely mounted in leather. Altogether it is a desirable acquisition to the desk and is characteristic of the house, in that it is first-class in every respect, thus in keeping with the reputation for the quality of their products.

The Roessler & Hasslacher Chemical Co., in a recent circular say: "There are increasing indications for an increased consumption for benzole, by reason of its use in a new field of industry. This new consumption is with the continental illuminating gas companies, who, in order to protect themselves against the constant encroachments of the electric light, are seeking to improve the illuminating quality of their gas by the use of benzole. We know from reliable sources that the use of benzole for illuminating gas purposes has been under consideration with interested parties for quite some time, and that large practical trials have already been made. Should this enormous prospective consumption enter the field, and the time does not seem far off, we can look forward to higher prices in benzole and to a consequent improvement in aniline products."

The manufacturers of the Langville lampblack, having confidence that its use would demonstrate its merit, have for the past year placed it upon the market regardless of price or profit, with the sole object of having it tested and introduced among the various trades who require a pure and reliable lampblack. They have now reached the point where its continued use has demonstrated beyond question that the special grades of the Langville black fully meets all these requirements, and the testimonials received from the manufacturers of patent, waxed and harness leather, oil cloth and rubber goods, where a dense and pure black is required, have met their most sanguine expectations.

Ex-Mayor William R. Grace and his brothers, Michael P. and John [illegible], have united their various firms in this country, England and South America in the form of a corporation, under the style of W. R. Grace & Co., which has been capitalized at $3,000,000, under the laws of West Virginia. The firms consolidated are W. R. Grace & Co. of New York, Grace & Co. of Valparaiso, Chile; Grace Bros. & Co. of Lima, Peru; William R. Grace & Co. of London, and J. W. Grace & Co. of San Francisco. The officers of the new corporation will be: President, William R. Grace; first vice-president, Michael P. Grace; second vice-president, John W. Grace; secretary and director, Edward Eyre; director, L. Grace; treasurer, J. Louis Schaefer.

Isaac Holbrook, head of the firm of Holbrook Bros., one of the oldest glass importing and jobbing houses in the country, died suddenly of heart disease last Monday, in his fifty-[illegible] year. He attended to business as Thursday, Jan. 3, when he [illegible] a meeting of the Manhattan Glass Company, of which he was treasurer. Mr. Holbrook entered the glass business thirty-five years ago, in the office of his elder brother, Edward F. Holbrook, the founder of the present firm, of which he became the chief partner in 1864. He will be succeeded as treasurer of the Manhattan Plate Glass Company by his brother, Mr. Harry Holbrook, who is now the sole surviving partner of the firm of Holbrook Bros. There will be no change in the firm name.

The specifications for supplies for the Mare Island Navy Yard, proposals for which will be opened on the 15th inst., comprise the following: Forty-two doz. paint brushes of various sizes; 200 lbs. Prussian blue in oil; 500 lbs. ultramarine blue in oil; 200 lbs. lump [illegible]ax; 2,000 lbs. metallic brown; 50 lbs. Van Dyke brown in oil; 50 lbs. red lump chalk; 200 lbs. white lump chalk; 500 lbs. concentrated lye; 50 lbs. ivory drop black in oil; 500 lbs. light hardwood filler; 20 packs gold leaf XXXX; 200 lbs. glue; 100 lbs. white glue; 10 lbs. light oak graining colors in oil; 20 lbs. mahogany graining colors in oil; 20 lbs. walnut graining colors in oil; 100 lbs. Marseilles green in oil; 1,000 lbs. chrome green in oil; 500 lbs. lampblack in oil; 100 lbs. lampblack, dry; 500 lbs. litharge, dry; 200 lbs. paste drier in oil; 50 bbls. North Carolina pitch; [illegible] lbs. putty; 100 lbs. pumice stone, lump; 500 lbs. polishing paste; 5,000 lbs. plaster of paris; 500 lbs. crude potash; 200 lbs. Indian red in oil; 200 lbs. Venetian red, dry; 300 lbs. Venetian red in oil; 50 lbs. rotten stone, lump; 10 lbs. rose lake in oil; 200 lbs. sal-ammoniac; 250 lbs. burnt sienna in oil; 250 lbs. raw sienna in oil; 100 lbs. sugar of lead; 200 gals. tar oil; 500 lbs. burnt umber, dry; 500 lbs. burnt umber in oil; 250 lbs. burnt umber, raw, in oil; 48 lbs. American vermilion, dry; 48 lbs. English vermilion, dry; 3,000 lbs. Spanish whiting; 100 lbs. chrome yellow, medium, in oil; 100 lbs. chrome yellow, orange, in oil; 100 lbs. chrome yellow, lemon, in oil; 10 lbs. yellow lake in oil; 1,000 lbs. yellow ocher, dry; 2,000 lbs. yellow ocher in oil; 200 gals. alcohol; 20,000 lbs. red lead; 30,000 lbs. white lead; brown and white zinc, 500 and 15,000 lbs.; Japan drier, gum shellac and varnish; 500 gals. turpentine; 500 lbs. lubricating grease and 1,000 lbs. tallow; 5,000 gals. boiled and raw linseed oil; 5,000 gals. lubricating oil; 5,000 gals. lard oil; 5,000 gals. cylinder oil; 50 gals. gasoline and 700 gals. mineral oil; 500 lbs. brown laundry soap.

PETROLEUM NOTES.

On Sunday evening, 6th inst., fire broke out in an oil warehouse of the Standard Oil Company at Canton, Md., causing a loss of $25,000.

The Boviard & Seyfang Manufacturing Company of Bradford, Pa., with branches at McDonald, Butler and Pittsburg, which went into the hands of a receiver on Dec. 1, 1893, has made arrangements with its creditors, and Judge Morrison has discharged the receivers.

The richest strike ever made in the Florence (Col.) oil fields has been made by the United Oil Company at Coal Creek, two miles from Florence city. The flow of oil has a fifty-pound pressure, while at other wells there the pressure is only nine ounces. The new well is said to be equal to any in Pennsylvania.

The annual report of the Ohio State Oil Inspector for the First District shows 268,343 barrels to have been inspected during 1894, on which the inspection fees were $13,417. There are seventy barrels of oil manufactured at Emlenton, Pa., rejected. But 19,313 barrels were manufactured in Pennsylvania, the remainder, 249,030, being made in Ohio, of which 192,965 barrels were refined in Cleveland, 54,673 barrels in Lima, 8,731 at Toledo and 519 at Findlay. Oil City, with 5,160 barrels, was the principal Pennsylvania point of supply, Titusville ranking second with 1,946 barrels.

Progress of Free Alcohol.

Washington, Jan. 12, 1895.

The fact that every possible agency is to be employed by the Treasury Department as well as by the leaders of the Ways and Means Committee of the House to secure the repeal of the free alcohol clause of the new Tariff law will be made clearly apparent by the tenor of Secretary Carlisle's answer to Senator Lodge's resolution asking for an estimate of the cost of enforcing the present law, which goes to the Senate to-day.

Secretary Carlisle and Commissioner Miller have had numerous conferences since Mr. Lodge's resolution was adopted and sent to the Department, and the views of the Commissioner of Internal Revenue have been incorporated in a letter, which Secretary Carlisle forwards to the Senate for its information.

It is as follows:

"In reply to your inquiry for an estimate of the expense of the administration of section 61, of the act of August 28, 1894, pursuant to the United States Senate's resolution of the 4th instant, I would say that nothing has come to my notice since November 28th last, the date of my last letter, which leads me to believe that the expense of official supervision was at that time overestimated.

"It was stated in that letter that the expense of the necessary official supervision would be not less than $500,000 per annum. This estimate was based upon the number of officers required, whose duties would be similar to those required of storekeepers and gaugers. There are about 1,600 distilleries in the United States, requiring the services of some 1,200 storekeepers and gaugers, and 650 storekeepers who were paid last year $1,200,000, at a rate of compensation ranging from $2 to $4 per day.

"It was estimated that if the number of manufacturers could be reduced by regulation to 1,600, a number equal to the number of distilleries and if these officers could serve as to these manufacturers more economically than they serve as to the distilleries, the expense for this service would not be less than $500,000 per annum.

"Since Nov. 28, I have obtained further information in regard to the use of alcohol by druggists and by manufacturers of patent medicines, and feel warranted in estimating the number of druggists who are now in the habit of buying alcohol in distillers' original packages, or other packages, containing each 40 gallons or more, at 3,800, and the number of patent medicine manufacturers at 200. It is not seen from these figures how the number of the favored class, as to those who use alcohol in any medicinal or other like compound, could well be less than 4,000. In fact, it is not clearly seen how any discrimination could be made against any druggist who makes medicinal or other like compounds in which (as happens in the business of all or nearly all druggists) alcohol is a necessary component part. It is true that druggists whose business does not warrant the purchase of the ordinary distillers' original 40-gallon packages of alcohol have heretofore usually purchased their supply in small packages, put up from distillers' packages by rectifiers and liquor dealers.

"As, however, distillers' original packages may, under the internal revenue laws, contain as small a quantity as ten wine gallons, it would seem that most druggists who have heretofore obtained the alcohol to be used in the manufacture of tinctures and extracts, from liquor dealers, will buy directly from the distillers or from those who deal in distillers' original packages containing ten wine gallons each. How can it be said that a manufacturer is not a manufacturer because the amount of business done by him is small? There being no special statutory definition in this instance, no such discrimination could be made by the Treasury Department. This being the case, it would seem that the number of manufacturers who daily, Sundays not excepted, use alcohol in medicinal or other like compounds, would be more nearly 32,000 than 1,600, involving an outlay of $10,000,000 rather than $1,000,000.

"Nevertheless, although these small druggists are required to make up these medicinal compounds at all hours of the day and night, and Sundays, their great number affords an opportunity for economical official supervision not otherwise possible. Even with this advantage, however, when the fact is also taken into account that the operations of photographers, manufacturing chemists, perfumers, manufacturers of flavoring extracts, hatters, paint and varnish manufacturers, manufacturers of tobacco and cigars, of woolen goods, of carpets, of mincemeat, and of glue would necessarily also be brought under the same surveillance when the use of alcohol in such arts and manufactures is claimed, it would seem to be improper to estimate the expense of an efficient administration at less than $1,000,000 annually."

The Secretary's reply to Senator Lodge's resolution is not offered as an estimate upon which to base an appropriation, and in spite of the rumors to the contrary, it is a fact that the Treasury Department has at no time presented a recommendation or estimate for this allowance in the current appropriation bills. What action will now be taken cannot be foretold, but it is improbable that the Senate Appropriation Committee will incorporate a provision in the pending bills on the strength of Commissioner Miller's letter.

The Republican Senators, who easily hold the situation in hand, have not receded form their original position of opposition to any tariff legislation at this session. As told in this correspondence last week, several Republican leaders have made a canvass of their colleagues for the purpose of ascertaining the consensus of opinion with regard to tariff and currency legislation, and this activity naturally spread alarm among the friends of free alcohol. The general feeling of uneasiness was made more acute by the attempt of certain Democratic leaders to add tariff "riders" to the Urgent Deficiency bill. This later movement has at no time been worthy of serious consideration and was soon abandoned. It was not, however, until Thursday of this week that the Republican leaders reported their canvass to Senator Aldrich and practically abandoned all thought of formulating a programme of legislation. With regard to the Free Alcohol bill, Senator Aldrich said to the Reporter's correspondent today:

"These little flurries are about over, and the situation remains unchanged. I do not believe there is the slightest chance that the free alcohol section will be repealed. As I said to the REPORTER a month ago, if we open the gates ever so little nothing can prevent the introduction of an avalanche of other amendments, and with only about forty working days of the session left I don't see how an agreement could possibly be reached on anything."

While Congress is doing nothing with the problem, there is more activity in the Department of Justice, Assistant Attorney Binney, who has charge of the Government's interests in the alcohol test case of the Brown Chemical Co. against the United States, has been informed that the attorney for the claimants will ask the Treasury Department to request the Attorney-General to advance the case in the Department of Justice, in order that it may be brought to a speedy trial. The Attorney-General has not decided whether he will accede to this request if it is made by the Treasury Department, but there is no doubt that the case will be reached sooner than was first expected, although not before the adjournment of Congress. Secretary Carlisle does not want to pay free alcohol rebates from the depleted Treasury, and intends that Congress shall have a full opportunity to settle the problem either by repealing the law, or by providing the necessary appropriation to carry it out. At this writing, there is little prospect that the question will be settled within the near future.

The Lead Rebate se.

Washington, Jan. 11, 1895.

Assistant Attorney-General Whitney expects in a few days to forward to United States District-Attorney McFarland full instructions regarding the suit to be brought against the National Lead Co., to recover alleged illegal rebates. Mr. McFarland, in reply to Mr. Whitney's letter of inquiry, which was referred to in these dispatches last week, has written an opinion as to the method of bringing suit. He suggests two alternatives, either the usual action to recover the amount of the rebates claimed to have been illegally secured, or an action which he thinks will lie under section 3050, Revised Statutes. As this section will probably be invoked in other actions to recover alleged illegal rebates, it is given here at length, as follows:

If any merchandise, of which entry shall have been made in the office of a collector, for the benefit of drawback or bounty upon exportation, shall be entered by false denomination, or erroneously as to the time when and the vessel in which it was imported, or shall be found to disagree with the packages, quantities or qualities, as they were at the time of original importation, except such disagreement as may have been occasioned by necessary or unavoidable wastage or damage only, and except also in cases where permission shall have been obtained according to law to alter or change the quantities or packages thereof, all such merchandise, or the value thereof, to be recovered of the owner or person making such entry, shall be forfeited, and the person making such false entry shall also forfeit a sum equal to the value of the articles mentioned or described in such entry.

Mr. Whitney stated to The Reporter's correspondent to-day that he had not yet determined which method the Government would pursue, but a decision would be arrived at without loss of time.

Antitoxine an Antipyretic.

In our import columns of this issue will be found an importation of nearly 25,000 ozs. of antitoxine, an antipyretic. This will be something of a surprise to the trade, and calls for explanation. It is made by the British Antitoxine Manufacturing Company of London, and is the first shipment to this country. It occurs as a fine white powder, quite soluble in water, but more so on the addition of a little glycerine. In action it is claimed to be a powerful antipyretic, analgesic, and anti-neuralgic, and to strengthen the heart's action. It has, thus far, been largely used by the medical profession in England.

The right to the use of the name antitoxine is vested in a United States patent dated Oct. 4, 1892, which we have been permitted to see, and which the proprietors claim antedates the use of the same word as applied to the diphtheretic serum. When the new drug was placed on the market in England, several of the leading medical and chemical journals took exception to the use of the name, but afterward retracted their remarks, stating that the discoverers of the diphtheretic serum in using the name had done so unknowingly or wittingly. The owner of the patent claims to have coined the word, which, judging from the action of the drug, might possibly be considered an arbitrary one.

Valuations on Imports.

The Board of General Appraisers at New York has reported the following advances in valuation of imports:

Bronze powder, from H. Rosenhaupt, Furth, Oct. 23, 1894: Pale gold, No. VI. marked 500, entered at .85 mark per pound, advanced to .95; rich gold, No. V. marked 800, entered at .96 mark per pound, advanced to 1.05; rich gold No. IV. marked 1000, entered at 1.06¼ per pound, advanced to 1.15; rich gold No. II. marked 4000, entered at 1.48¾ mark, advanced to 1.60; rich gold No. I. marked 6000, entered at 1.70 mark, advanced to 2.00; natural copper No. VI. marked 500, entered at .96 mark, advanced to 1.10; natural copper No. III. marked 2000, entered at 1.38⅛ mark, advanced to 1.50; white No. VII. marked 500, entered at 1.06¼ mark, advanced to 1.20; white No. III. marked 2000, entered at 1.48¾ mark, advanced to 1.70; cases, tin cases, paper and packing included.

Dyewood extract from John W. Spence & Co., Glasgow, Nov. 2, 1894: Fast black, entered at £22 7s. 6d. per ton, no advance; soluble oil, entered at £7 5s. per ton, no advance; cost of barrel included.

Sulfonal from Elliot & Co., Toronto, Nov. 27, 1894, entered at 27 cents per ounce, no advance.

Tin foil from E. T. Ohle's, Erben, Breslau, Sept. 7, 1894, 1 inch, 2¾ inch and 4¾ inch, 18 square meters per kilogram, entered at 192 marks per 100 kilos, advanced to 198. Add cases and packing.

(Special Correspondence to the Reporter.)

New England Paint and Oil Club.

Boston, Jan. 11, 1895.

The regular monthly meeting and dinner of the Paint and Oil Club of New England was held at the Exchange Club last Wednesday afternoon at 5 o'clock.

The guests were Thomas W. Proctor, Henry Sandham and F. L. Lavanburg of New York.

President A. W. Strauss presided, and called the company to order immediately after the dinner.

Under the head of business Robert D. Archer was elected a member of the Pricing Committee for the month of February.

The following communication was received from the Trades League of Philadelphia:

Philadelphia, Pa., Dec. 11, 1894.

Gentlemen: We beg to call your attention to a matter of great importance to the commercial interests of the country, and which, in our judgment, requires prompt action on the part of business men to prevent the passage of the bankruptcy bill, known as the Bailey Bill, H. R. 4609, Senate calendar 609, which has already passed the House and is, we are reliably informed, in a position to be considered and acted upon at an early date in the Senate. We call attention to some of the defects of this bill, and ask your early consideration. Immediate action is absolutely necessary if this bill is to be defeated. Very truly, W. W. FOULKROD.

A letter was received from Senator Lodge in which he stated that he should do all in his power in the interest of the Torrey bankruptcy bill.

Secretary Lew C. Hill read the following resolutions:

Whereas, It is reported that a member of this club has discovered a new system of using white lead for painting purposes, by which the quantity employed will be lessened one-half;

Resolved, That the discovery is likely to be a severe innovation upon the general sales of the article, and hence a great injury to the white lead manufacturers;

Resolved, That it is our duty to condemn this act by every honorable means at our command;

Resolved, That we owe our great sales of white lead to the lead trust, because of their extreme care for its uniform purity.

It was unanimously voted to refer the whole matter—the resolutions, the idea and the "member" referred to in the resolutions—to Mr. Asahel Wheeler for investigation.

Following the above resolutions Mr. Asahel Wheeler spoke as follows:

Our brother is accused of an attempt to destroy the white lead business by the introduction of a new system of painting, which lessens the consumption of it more than one-half.

Now, this is an important subject, which is worthy of serious consideration by every individual concerned, even the consumers.

But first let us examine, and then we can determine if there is cause for an alarm.

By means of the great improvements made in the manufacture of linseed oil, the machinery is so powerful and so nicely adjusted that not enough of the oil remains in the cake to soil the whitest kid glove in handling it. Hence it is proof of the strictest economy being exercised in this direction, by which we have the finest, most limpid and transparent oil possible to be made. The improvements in the manufacture of white lead consist of greater expedition, fineness, whiteness and adulteration with material which is invisible, but of no expense whatever, and yet helps to lessen the cost to manufacturers. It tickles the senses of avarice as wine does the palate, and leaves naught behind. Explanation! When employed for exterior painting purposes, it makes a good showing at first, but the third year of its service it is useless; it has become as a shadow.

Our brother here is arraigned as an enemy against this great combination of paint manufacturers and dealers, as a destroyer of its consumption by introducing a new system for its application, which is economic, causing it to do two or three times the service which it is wont to do, thereby making an actual saving to consumers of millions of dollars in the aggregate when this system shall be generally adopted. In times past white lead and linseed oil were valued for their long service.

In these later times their value is reckoned by a currency value at the moment.

As I am informed, this young and enterprising brother has a process of treating and applying the oil by which it resists the action of the elements at least three times as long as ordinary oil. For instance, here is a fair comparison: A house being painted by his system costs $120, which will last nine years, when by the present method of painting it costs $100 and will last but three years, thus showing a difference of cost against the prevailing custom to be $180. Which is a truthful statement of the matter.

Is this club prepared to condemn the brother for his spirit of progress?

In this age of great improvements much is expected from every branch of industry, and yet nothing has been accomplished in the art of plain painting to add to the past fifty years.

Why this apathy, or lack of interest, in our patrons, especially the consumers? We take their money freely, and in return give them the commodity asked for and nothing more. As one of our members once remarked, that what we know about the paint business is the name marked on the package.

F. W. Devoe & C. T. Raynolds Co

For Painters, Artists and Decorators

All the brands and specialties of F. W. Devoe & Co. and of C. T. Raynolds & Co. will be maintained separately as heretofore.

No one of our club would willingly be accused of deception, and yet daily he may be known as representing his goods of the best quality which he is entirely ignorant of, or it may be the result of a careless method of doing business.

The principle upon which the lead and oil business is now conducted is for largest sales and smallest profits. Through ignorance the consumer reckons his profits at the wrong end, which does not appear under about two years, and then generally by a loss. Shall we allow the public to remain ignorant of the fact that they are losing money every time they paint, or shall we attempt to enlighten them by our knowledge of the real facts in the case?

I feel a just pride that I am speaking in defense of the principles that our forefathers taught us more than half a century ago, whom I remember as among our first class of citizens, daily appearing on 'Change at noondoay, mingling with the merchants on State street. To such men were intrusted the care of estates which needed painting, and they faithfully studied the interest of the proprietor, which was a service of seven years' duration.

It seems to me that we have already run the paint business down to the fine point of the tail end.

But I have confidence that some of us will live to see a reaction, that instead of following it up much longer to the shadow of paint we shall react and seek the substance.

Money is at the bottom of this race for business, but should not influence us so much as to lead us in a way to deceive in quality. I am positive that I have discovered the secret of reproducing all the durability of paint hitherto known to those who have preceded me in the business.

Mr. John D. Morton said: "There is one matter which should be brought to the attention of this club, namely, the advisability of appointing a commission for a long time or for life, who shall have control of all matters relating to the tariff—according to the resolutions and considerations adopted by the National Paint, Oil and Varnish Association at its annual convention last October. This measure relates to the bill offered by Senator Pettigrew in Congress."

Mr. Morton offered the following resolutions:

Resolved, That the Paint and Oil Club of New England favors the creation of a United States Tariff Commission, its duty being to obtain information and make recommendations regarding duties on importations, substantially in accordance with the bill introduced into Congress in June, 1894, by Senator Pettigrew of South Dakota.

It was voted that a copy of this resolution be forwarded to all the New England Congressmen, and that it be referred to the delegates of the Paint and Oil Club, to the Boston Associated Board of Trade and to the Massachusetts State Board of Trade.

Mr. John D. Morton made a motion that the president appoint a committee to consider the advisability of charging interest on turpentine after thirty days, and on white lead after sixty days, which was adopted and the president will announce the committee later.

Mr. George L. Gould, chairman of the Executive Committee, reported that the commitee to whom the matter was referred had unanimously voted to make the February meeting of the club a "Ladies' Night."

The motion offered by Mr. H. A. Robbins at the December meeting, relating to "Ladies' Night," was unanimously adopted.

Interesting and entertaining speeches were made by Mr. Thomas Proctor and by Mr. Henry Sandham, the well-known Boston artist.

ALLAN ERIC.

(Special Correspondence to the Reporter.)

Petroleum for Cooking Stoves.

Washington, Jan. 11, 1895.

For the benefit of numerous inquirers the State Department some time ago instructed United States Consul-General Jonas, at St. Petersburg, to report upon the use of petroleum in Russia for domestic and cooking purposes. Mr. Jonas' report received at the Department to-day is as follows:

I have made extensive inquiries, the result of which may be summed up briefly. For domestic heating purposes petroleum is not used in Russia at all. the predominant fuel in the largest portion of the empire being wood supplemented with coal. For cooking purposes, kerosene is used only on a very limited scale, and in exceptional cases, much less so, on the whole, than in the United States. The ordinary American kerosene stoves have been largely imitated in Germany, and introduced in the Russian market. They are of various sizes, and sell as low as six rubles, or about $3 apiece. Of the larger sort, the variety most in favor seems to be the "Brilliant" kerosene cooking stove, sold at 14 to 16 rubles. They are simply imitations of well-known American originals.

In the last few years a kerosene gas burner of Swedish origin and manufacture has been introduced in Russia, and there is said to be a considerable demand for it. This kerosene gas burner is also known and patented in the United States. By means of an air pump the petroleum is forced from the reservoir into a cylinder, encircled in its upper portion with a basin in which alcohol is burned to heat the cylinder and change the rising kerosene into gas, in which form it reaches the burner. The ordinary domestic petroleum gas burner, made of brass, is sold at 7 rubles, or $3.50. About 20,000 are said to be in use in Russia.

The Statute of Limitations.

The statute of limitations runs against claims growing out of alleged infringement of patents, as well as against claims arising under other transactions. This was the unanimous judgment of the Supreme Court of the United States delivered by Mr. Justice Brown, in deciding the case of Christopher C. Campbell against the city of Haverhill, Mass., appealed from the Circuit Court of the United States for the district of Massachusetts. Campbell sued the city of Haverhill for an infringement of the Phillips patent for the improvement of pumps.

On the trial it was held that the State statute of limitations was a good defense to the claim. In announcing the opinion Justice Brown said that the question had been decided both ways by Circuit Courts in about twenty cases, and the weight of authority was about equally divided. In the absence of any Federal statute on the subject, the opinion of the Court was that in the several States their respective statutes of limitations should apply. The decision is said to be of great importance, in New York especially, where suits have been brought to recover claims amounting to many thousands of dollars for infringement of patents.

The Lard Supply.

We are indebted to the N. K. Fairbank Company for the following cable advices giving the estimates of the stocks held in Europe and afloat on the 1st inst., to which are added estimates of last year and stocks in cities named:

	1895. Jan. 1.	1894. Dec. 1.	1894. Jan. 1.
Liverpool and Manchester	21,000	15,000	8,000
Other British ports	3,000	4,000	3,500
Hambrug	10,900	4,500	3,500
Bremen	1,500	2,000	500
Berlin	1,000	1,000	2,500
Baltic ports	6,500	6,000	5,000
Amsterdam, Rotterdam, Mannheim	4,500	3,000	500
Antwerp	4,000	3,000	2,000
French ports	10,000	9,500	5,000
Italian and Spanish ports	1,000	1,000	500
Total in Europe	62,500	49,000	31,000
Afloat for Europe	51,000	54,000	33,000
Total in Europe and afloat	113,500	103,000	64,000
Chicago contract	31,705	13,284	2,111
Chicago other kind	5,214	5,710	3,046
East St. Louis	950	250	250
Kansas City	13,054	6,301	3,300
Omaha	2,654	3,225	549
New York	13,759	9,749	10,371
Total tierces	180,836	141,510	83,627

San Domingo Tariff Changes

Washington, Jan. 11, 1895.

The State Department is informed that the Government of San Domingo has promulgated the following tariff rates, to take immediate effect:

Common soap	free
Lard	free
Butter	free
Starch, per quintal	$2.00
Sapolio, per quintal	4.00
Soap, coco, per quintal	4.00
Mineral water, per dozen bottles	1.50
Ginger ale	.70

(Special Correspondence to the Reporter.)

Petroleum Trade of the Straits Settlements.

Washington, Jan. 11, 1895.

United States Consul-General Pratt, at Singapore, has made the following report to the State Department on the petroleum oil trade of the Straits Settlements:

"The official Government returns place the total imports of petroleum into the various ports of the Colony for 1893 at 1,056,167 cases, as against 885,472 cases for the previous year, an increase of 170,695 cases.

"As regards the imports of American oils, the figures as shown above do not tally with my own, which for 1893 are at Singapore (as per our landing certificates) 264,690 cases, and at Penang (as per United States Consul Agent's reports) 56,802 cases, making a total of 321,492 cases, or 80,263 cases more than stated by the Government.

"Notwithstanding this, however, you will note that it is from Russia and Sumatra that the greatest increase in importation has taken place, the one having risen from 594,151 cases in 1892, to 507,137 cases in 1893; the other from 104,298 cases in 1892, to 276,792 cases in 1893.

"This augumentation in the latter would seem mainly due to the fact that the island of Sumatra is within such easy reach of these settlements, the other to the foresight of the Russian importers in bringing the greater portion of their oil here in bulk, and then storing it in reservoirs, one of which they have constructed just off Singapore and the other, of which I send a description, near the port of Penang.

"With these advantages it is not surprising that petroleum from Baku is supplanting that from our wells in this market.

"In conclusion I will say that in my opinion the only way in which the Americans can make their oil hold its own and successfully compete with its rivals in this most valuable trade, is to have tank steamers in which to transport it here, and reservoirs on the spot in which to store it on arrival.

"The large amount of exports from the Straits Settlements to the United States would seem clearly to show that such vessels could safely depend upon having return cargoes."

In describing the reservoirs referred to, the report says:

"There are two storage tanks with a combined capacity of 3,000 tons of oil, equivalent to some 105,000 cases. From these tanks an eight-inch steel pipe runs to the end of the jetty (at which a vessel of 7,000 tons, drawing 27 feet of water can safely moor) and is connected with the steamers by a flexible hose pipe of special construction. The steamers are fitted with powerful 12 inch pumps capable of discharging a full cargo in 24 hours. A third tank of smaller size joins the two large ones, and is also connected to the main pipe line. It is termed a 'setting' tank, and is a useful adjunct for gravitation to the filling shed when the level of the main tanks gets too low.

"Near at hand is a can-making factory, where boxes of tin plates are quickly converted into kerosene tins. The work is done by approved machinery, and the plant has a capacity of 2,600 tins a day."

The Paint Trade in England.

Those who desire to do trade with England should take into consideration that at least nine-tenths of the paint material sold is through dealers. As a rule, the large paint manufacturers do not find it pay them to cater to the small painter except with certain specialties. There is a good chance for some of the paint machinery men whose patterns are up to date. Liquid wood filler is unknown and liquid dryers are employed to a very limited extent. Special efforts are made to obtain orders from ship owners and builders, and patents for new anti-fouling compositions for ships' bottoms are almost as plentiful as patents for car couplers here. Most of the large paint manufacturers make their own varnish and boil their own oil on an extensive scale.

Peace River Phosphate Industry.

As intimated in a recent issue, the uniting of all the Peace River phosphate companies has taken formal shape. The respective companies have united their interests and have formed a new company, the style of which is the "Peace River Phosphate Mining Company." The capital stock is $1,250,000, all paid in, with permission to increase to $5,000,000, if desired. This arrangement will unite the interests of the following companies: The Peace River Phosphate Company of New York city; the Arcadia Phosphate Company of Savannah, Ga.; the De Soto Phosphate Mining Company of Atlanta, Ga., and the Charlotte Harbor Phosphate Company of Savannah.

A charter has been granted by the State of Georgia, and the following officers and directors were elected on the 29th of December, to wit: President, Joseph Hull of Savannah; Vice-President, M. F. Knudson of New York; Treasurer, R. W. Paterson of New York; Secretary and Assistant Treasurer, H. P. Richmond of Savannah.; Directors, George W. Scott of Atlanta; H. M. Comer, H. M. Comer, Jr., and Joseph Hull of Savannah; M. F. Knudson and R. W. Paterson of New York.

The total property owned by this new company will be 24,000 acres of phosphate land and river (with four finely appointed plants). Said acreage begins at Bowling Green and ends at Charlotte Harbor, giving over ninety miles of river, with the adjacent land. The productive capacity of these four companies is quite 150,000 tons river pebble phosphate per annum, the greater part of which is sold for export to the United Kingdom and Continent of Europe. The easy working of this rock and the large yield of soluble phosphoric acid make it among the most valuable river rocks.

THERE is but one way in the world to be sure of having the best paint, and that is to use only a well-established brand of strictly pure white lead, pure linseed oil, and pure colors.*

The following brands are the standard "Old Dutch" process, and are always absolutely

Strictly Pure White Lead

"ANCHOR" (Cincinnati).
"ARMSTRONG & McKELVY" (Pittsburgh)
"ATLANTIC" (New York).
"BEYMER-BAUMAN" (Pittsburgh).
"BRADLEY" (New York).

*If you want colored paint, tint any of the above strictly pure leads with National Lead Co.'s Pure White Lead Tinting Colors.

NATIONAL LEAD CO., New York.

It is not expected nor intended that the market price shall be materially advanced, the chief effort being to limit the cost of production and to do away entirely with the sharp competition to which each of the above original companies were subjected in disposing of their respective stocks. Large economies have already been instituted in the new management, and a promising future seems to be assured.

Insects Injuring Drugs.

By Vernon L. Kellogg.

Some jars of insect-infested drugs referred to me by the Department of Pharmacy of the University of Kansas, led me to make a superficial examination of the drugs stored in glass, tin, wooden and paper vessels in the storerooms and laboratories of that department, which resulted in noting the following drug-attacking insects:

Sitrodrepa panicea Linn, attacking blue flag rhizome (Iris verssicolor); confrey root (Symphytum officinale); dogbane root (Apocynum cannabinum); ginger rhizome (Zingiber officinale); marshmallow root (Althaea officinalis); aniseseed (Pimpinella anisum); aconite tuber (Aconitum napellus); musk root (Ferula sumbul); Indian turnip rhizome (Arum triphyllum); belladonna root (Atropa belladonna); witch hazel leaves (Hamamelis virginica); powdered coffee seed (Coffea Arabica); wormwood stems, flowers and leaves (Absinthium sp.); thorn-apple leaves (Latura Stramonium); cantharides (Cantharis vesicatori), and thirty other different drugs.

Lasiorderma serricome Fab., attacking powdered ergot (Claviceps purpurea). Ptinus brunneus Duft, attacking musk root (Ferula sumbul); powdered senna leaves (Cassia actuifolia), and powdered Jaborandi leaves (Pilocrpus pinnatifolius). Silvanus surinamensis Linn, attacking almond meal (Amygdala dulcis).

Silvanus advena Waltl., attacking aconite tuber (Aconitum napellus). Silvanus sp., attacking aconite tuber (Aconitum napellus); ginseng rhizome (Panaac quinquefolium); henbane leaves (Hyoscyamus niger); senega root (Polygala senega). Tenebrio obscurus Fab., attacking parsley root (Apium petroselinum). Paromalus sp., attacking powdered poke root (Phytolacca decandra). Anthrenus varius Fab., attacking powdered cramp bark (Virbunum primifolium).

Atropos divinatoria Fab., attacking henbane leaves (Hyoscyamus niger), and golden seal (Hydrasdis canadensis); Lepisma saccharina Linn., attacking powdered mezereum bark (Daphne mezereum), and socratine aloes (Aloe socratina).

The cosmopolitan and omnivorous little Sitrodrepa panicea was by far the most abundant and widespread in the storerooms. It is really a serious pest of stored drugs. In the case of the cantharides attacked by it, the bodies of the cantharis beetles were completely riddled and broken. Of the thousands of bodies in the canister not one seemed to have been left unattacked. In many other instances the damage done to the drug was considerable.

The remedy, other than preventing the ingress of the insects by using tight jars and canisters, is to expose the infested drug to the vapor of carbon bisulphide. The ease with which this may be done in the case of most drugs gives the druggist a feasible, effective and almost universally applicable remedy.

The Caspian Petroleum Field.

In view of the recent alleged efforts at alliance between the petroleum producers of the United States and Russia, a note on the oil-bearing region of the Caucasus may be of interest, says George T. Becker, in the Cosmopolitan. "It appears that the foothills of the Caucasus, particularly those on the northerly side, show abundant evidence of the presence of oil all the way from the Sea of Azof to the Caspian. The oil belt seems even to continue eastward of the Caspian; but, substantially, all of the yield comes from the peninsula of Apsheron, on the western side of the Caspian, not far from the town of Baku. The entire area which has produced oil for shipment is estimated at less than 1,800 acres, and yet the shipments of oil from Baku in the last fourteen years are equivalent to over 140,000,000 American barrels.

"The Apsheron peninsula is low, but uneven, and it is occupied by tertiary and post-tertiary rocks. The oil occurs in the more porous tertiary strata, and naturally efflux takes place along lines of rupture in the folded beds, which do not seem to be considerably altered. As in this country, a part of the oil is obtained from flowing wells, and in 1893 these yielded one-third of the product. The Baku oil is very different, chemically, from that of Pennsylvania. Our soil consists mainly of hydrocarbons, analogous to paraffin, and known as the 'paran series.' The Caspian oil contains less hydrogen, and is composed almost exclusively of the olefine series,' which, however, is also represented to a small extent in the American oil.

"The origin of petroleum is still a mystery. It seems really incredible that animal or vegetable oil should so accumulate as to furnish the output of Baku. A hundred thousand right whales would be required to supply as much oil as Baku exports yearly. It is also very significant that the deposits follow a line of profound terrestrial disturbance—that of the Caucasus. It was to account for these oil fields that Mendeleeff put forward his hypothesis. He supposes, on grounds which are by no means absurd, that there are vast masses of metallic iron within the earth, resembling meteoric iron, and containing carbon. The action of acids on such iron produces hydrocarbons, which are sometimes identical with those of the Baku oil. If one accepts the supposition of the existence of iron in great quantities within the earth, this theory leads to fewer difficulties than that of organic origin; and since such iron has been brought to the surface of the earth at a number of points by eruption, the plausibility of the hypothesis is great."

Recent Patents.

531,752. PROCESS OF EXTRACTING TANNIN. Filed Aug. 18, 1894. Issued Jan. 1, 1895.

Claim.—1. The process of producing tannin by treating raw materials containing the same with the acetate of amyl, thereby dissolving the tannin and separating the same from foreign bodies and subsequently separating the tannin from its solvents, substantially as described.

2. The process of producing tannin by treating raw materials containing the same with acetate of amyl, thereby dissolving the tannin and separating the same from foreign bodies, and subsequently separating the tannin from its solvents by the addition of benzin or other organic solvents, substantially as described.

WHY ARE THE

National Lead Company's

PURE WHITE LEAD TINTING COLORS

So Popular Everywhere?

For the Best of Reasons, Namely:

THEY SUIT THE DEALER
THEY PLEASE THE PAINTER
THEY ARE WHAT THE HOUSE OWNER WANTS

They Suit the Dealer—Because with a small investment and very little store space he has, with his ordinary stock of Strictly Pure White Lead, a complete assortment of Colored Paints.

They Please the Painter—By enabling him to obtain or match a shade of color without loss of time or material.

They are a Boon to the House Owner—As he can now have his building painted any desired color with the best of paints—Strictly Pure White Lead.

The National Lead Company's Pure White Lead Tinting Colors are put up in one pound cans, and are so prepared that one pound will tint twenty-five pounds of Strictly Pure White Lead to the color numbered on the can, which, when mixed according to directions, will produce about two gallons of paint ready for use—and the **Best Paint that can be Made.**

These Tinting Colors are for sale by reliable dealers everywhere. No stock of Paint is complete without them. Write to us for full information.

Complete prices current will be found on page 31

SATURDAY EVENING, January 12, 1895.

The week, while exhibiting as a result of its transactions a slightly improved appearance upon those that we have recently passed through, is still far from being a fair one in the amount of business accomplished. White lead is extremely dull, with scarcely any sales whatever other than a few of a very ordinary and jobbing nature. Red lead is also without features of interest, but it is thought that a few weeks more will see a very good revival of business, not only in these staple colors, but throughout the whole range of dry colors as well as mixed paints, which are all at the present time much neglected by the consuming trade.

WHITE LEAD.—After a "harmonious" session, held in this city of four days' duration, by the committee of the corroders, appointed at the recent meeting of the lead corroders, before which all questions affecting the lead interest are presented for adjustment, they closed their labors by settling the matter of differential delivery points in the West, as claimed by one of the corroders. The trade here, however, are inclined to believe that there is more behind this than has come to the surface. There have been reports current that the price list would be revised, but the committee decided to make no change for the present, or, at least, not until the foreign competition becomes more aggressive than at present. The reports that Western dealers were cutting the price list is denied by those interested, though there is no doubt but that some cutting has been indulged in at Western points by those anxious to secure all the business they can from their competitors. Dry lead is only fairly active, as grinders are still holding back their orders in hopes that the weakness displayed during the past few days in linseed oil may result in a drop in the price of that article. Lead in oil is doing better, and considerable business has been done at regular prices. Buyers are required to elect before April 1 how much of their contracts they will take and pay for at that time the balance of their contract for delivery over the year being subject to any changes that may be made in the price list. Since the recent drop in the price by the domestic corroders, it is rumored around the trade, that buyers who purchased considerable stocks of foreign makes of lead in oil are demanding a reduction, which, if denied, they will decline to receive the lead upon arrival. This, however, will, no doubt, be satisfactorily arranged later on by the various selling agents. For well-known English makes they are quoting 6½@7c., as to make and quantity. Other makes, however, are purchaseable at 5¼@5½c., as to make, quantity and date of shipment. Several small lots of German have recently come to hand, and further shipments are quoted for early Spring delivery at 5⅛@5¼c., as to make, for a round lot. The recent price list issued by the National Lead Company is as follows, subject to change without notice: Pure white lead, dry and in oil, red lead or litharge in kegs, in lots of less than 500 lbs., 5¾c.; in lots of 500 lbs. and over, 5¼c. Red lead and litharge in barrels and half barrels, ¼c. per lb. less than price in kegs. White lead in 25-lb. tin pails, ½c.; in 12½-lb. tin pails, 1c.; in 1 to 5-lb. tin cans (100 lbs. in a case), 2½c. per lb. above keg price. Terms: On lots of 500 lbs. or more, 60 days, or 2 per cent discount for cash if paid within fifteen days from date of invoice. Special price for dry white lead in barrels. The above prices and terms supersede all previous prices and terms offered by this company. To buyers of twelve tons or more from this date to Dec. 31, 1895, a rebate of ¼c. per lb. will be allowed.

RED LEAD.—Trading has been unusually slow during the past week. Buyers are only taking such lots as their current wants require upon regular contracts which they have with domestic makers at prices ranging from 4½@4¾c., as to quantity and section, less the usual discount. German is quiet, though rather more inquiry is reported for parcels to arrive, as the bulk of the recent arrivals was all sold previously for consumption. For future arrival they are quoting 4⅞@5c., as to quantity and make, though there are other brands which are procurable at a shade less.

LITHARGE.—There is no change in the position of this article, the demand for which from the rubber trade is about over for the present. The glass

trade, however, is drawing rather more freely upon their regular contracts with now and then a new order coming along. Sales are reported of twenty tons at 4¼@4¾c., as to place of delivery and quantity, less the regular discount. For the finer grades there is a fair demand at unchanged figures.

ORANGE MINERAL.—The usual demand prevails for French, both for future delivery and for spot parcels. Values for the leading brand continue steady at 8¼c. for arrival and at 8¾@8½c., as to quantity, for store parcels. Sales aggregating 25 casks are reported within the range. There are other makes of French which are procurable at 7@7¼c., as to the size of the order. German is a shade firmer, owing to recent arrivals all being sold for consumption. For further parcels to arrive they are quoting 6¾@6⅞c., as to make and quantity, while for jobbing parcels a higher price is named. Domestic is meeting with the usual seasonable demand at 6½@6¾c., as to quantity, less the usual discount.

PIG LEAD.—The market is firmer in all positions, owing to the free buying on the part of Western speculators, who have been covering short sales made some months ago to depress the market. Sales are reported of 300 tons of common in the West at 2.87½c. and 200 tons of refined at 3.07½c., delivered in a Western city. In this section there have been sales of several hundred tons of common at 3@3.05c. and of refined at 3.15@3.20c., as to quantity and date of delivery. The London market is cabled at £9 12s. 6d. for soft Spanish.

ZINCS.—During the week considerable contracts for 1895 delivery have been booked at regular prices, but beyond this the demand for spot goods has been light, as buyers are waiting to hear the results of the White Lead Corroders' meeting, whether any concessions will be made in the price of dry lead. There is, however, a good export demand, which is taking up considerable quantities of surplus stocks in makers' hands. Values remain unchanged for the present for jobbing parcels at 3¾@4¼c., as to quality and quantity. German is dull at 4½@4¾c., as to make and quantity for arrival, but for a round lot a shade less could be done. French, though quiet, is still procurable at 5¼c. and upward, as to grade and quantity.

Dry Colors.

REDS.

CARMINE—Remains dull and practically inactive. Buyers are not urgent inquirers, and in the absence of any stimulation to the very ordinary demand of the last month or two, business is chiefly of a retail nature. Certain dealers, however, are holding to the old price of $2.60@$2.65 for their brands, and report sales at that figure. The current quotable price, however, is at the range of $2.00@$2.10, the price at which the majority of holders have been offering for some time. English is steady in price, but uncalled for at $2.60@$2.75, as to grade and quantity.

VERMILION.—A little better inquiry appears to have arisen, and manufacturers are hopeful of considerable activity during the season just about to open up. Prices are steadily maintained at 58@59c. for bulk and bag lots respectively, and small parcels will sell for a few cents higher than these figures. Importations of English are offered at 64@65c., as to quantity.

VENETIAN RED.—There is still considerable dullness about the market, and prices are hardly more than fairly steady. No marked downward tendency is noticeable, however, and an improved demand is confidently looked for.

BLACKS.

CARBON—Is quiet as compared with the business in progress during the Fall season. This is due, of course, largely to the "off" season of the present time, together with the deterrent influences of the Christmas holidays. Prices are quoted firm at 4@5c. Shading would, no doubt, be indulged in to a limited extent were there an opportunity just now to do business.

LAMPBLACK.—Together with carbon and the other blacks, this pigment has felt the influence of the dull period always present at the closing of the year and during the final arrangements for a coming season's activity. Prices are nominally steady, and we quote commercial at 4@7c.; refined, 8@12c., and calcined, 12@20c., as to grade and quantity.

BLUES.

PRUSSIAN—Is in very fair jobbing demand, and occasional orders are received for very fair-sized quantities. The market is resuming its usual settled and steady appearance, which was rather upset by recent annual festivities, and prices are quite steady at 36@38c., according to quality.

ULTRAMARINE—Is moving in a small jobbing way, and sales are restricted to almost retail limits. Nothing further can be said of the market than that it is extremely dull and quite uninteresting.

BROWNS.

UMBERS—Are slow to find purchasers. The new year started in quite briskly, but the demand soon slackened into only a very dull and irregular inquiry. Prices on the same range as previous quotations are strictly adhered to, and are 2¼@3¼c. for burnt and powdered Turkey, as to grade and amount of purchase.

YELLOWS.

OCHRES.—The inquiry for these colors is very light indeed, yet an improvement in demand and in the general average of sales is confidently looked for, and the Spring will doubtless see very fair quantities in distribution. We quote Rochelle at 1¼@1½c. per pound, and domestic, $11.50@$19 per ton, as to grade.

Miscellaneous.

BARYTES.—Orders, though coming somewhat freely to hand, are generally for small jobbing quantities, and consequently the results are not very encouraging. It is thought that, as the season advances, consumers' needs will increase and they will order more largely than they are now doing. Current prices are unchanged.

CHINA CLAY.—At the beginning of the year there was quite a little rush of orders and business was quite brisk for a time, but the past week has seen this stimulated trade subside in a marked manner. The condition of the market is quite healthy, however, and jobbers and dealers are quite hopeful of better times than they have seen during recent months. Quotations are ranging at $12@$17, as to quality.

PUTTY.—There is considerable slowness in demand just now, and this has been noticeable ever since the last month of the old year came into existence. Prices are firm, nevertheless, and are quoted at $1.45@$1.75 for bulk lots. Bladders are selling at $1.65@$2.

TALC—Is quiet, with but little interest manifested in it by the consuming community. Renewed activity is expected to return in a short time.

TERRA ALBA.—Importers are, at the moment, caught short and are hustling to scrape together enough to satisfy their customers until goods now on the way shall arrive. This looks as though there was a better demand than that formerly existing, and this, in a measure, is true. There is a slight strength-

Which is Quick Process White Lead?
EXTRACT FROM REPORT OF F. M. MULLER, CHEMIST.
"The **buckles of lead** used by the **DUTCH PROCESS CORRODERS** are **ONE-EIGHTH (1-8) OF AN INCH THICK**, and a cube one-eighth inch square weighs 267 milograms. By actual count under a powerful microscope it required **SIXTY-FOUR THOUSAND (64,000) particles of atomized lead** used by the **Carter Co. Process** to weigh 267 milograms, or to equal a cube one-eighth (1-8) of an inch square, or it would take **FORTY (40) particles** of lead placed one on another to make a thickness of one-eighth of an inch."
The Carter Co. expose the fine particles of blue lead to the corrosive agencies (the same agencies used by the Dutch process) for **TEN DAYS** and nights before a thorough corrosion takes place.
Now if the **atomized particles** of blue lead **were AS LARGE as the thickness of the buckle** used by the **"DUTCH PROCESS" CORRODERS** it would require **FORTY TIMES** the length of time, or **FOUR HUNDRED (400) DAYS** for complete corrosion
The **"DUTCH PROCESS" CORRODERS** turn out their white lead in **ONE HUNDRED (100) DAYS**, which shows conclusively that **THEY CORRODE FOUR TIMES AS FAST AS THE CARTER CO.**

We call attention to the PURITY, Strength and Brilliancy of our Chemically Pure Colors, also Purity of their undertone, and the unerring accuracy with which they hold their tone when adulterated to the furthest point. Many colors sold as Chemically Pure are not Chemically Pure, but contain Sulphate and Carbonate of Lead, weakening not only their strength, but their durability. We invite technical and practical tests.

BINDERS Holding One Volume (6 months) of the REPORTER will be forwarded by mail on receipt of ONE DOLLAR. They are perfectly Simple, and one can use them. Address the OIL, PAINT AND DRUG REPORTER, 72 William Street, New York. A bound volume of the REPORTER is a complete history of the Paint, Oil and Drug Markets for half a year

ening about the demand, but it is not extraordinary in its proportions, however. Prices are firm and unchanged.

MIXED PAINTS.—No fresh demand has sprung up yet, and in consequence the market is very dull and quiet. There is hardly anything being done in the way of actual sales or shipments, and manufacturers keep busy only by making detailed preparations to meet the inflowing demand, which is quite sure to arise before long.

Glues.

The inquiry since the first of the year has been very fair, but the general condition of full stocks and limited demand still holds. In the absence of special pressure to sell, prices are firmly held. Foreign glues are quoted firm to higher and there is a considerable importation.

Varnish Gums.

There is a gradual return of activity in the way of inquiries and occasional purchases. The present condition of the market bids fair to see a gradual but healthy return of business, which characterized the market before the many conflicting currents of "hard times" demoralized the trade. Values have not increased, though they are decidedly stronger. Copal is quoted at 40@50c.; Zanzibar, 35@65c., and Kami, standard, 17@18½c., while handscraped may be had at 24½@26½c. Manila is offered at 9½@25c.

Glass.

WINDOW.—The market has been quiet, but locally the feeling is fairly steady, and there has been no quotable change on either domestic or imported. A Chicago jobber writes under date of the 16th inst.: "The window glass market is in as bad shape as it possibly can be. The manufacturers are holding secret meetings, and no doubt expect to surprise the larger buyer with a big advance soon, but, in my opinion, they will have to lessen the output, or arrange to take the glass from the factories that are unable to carry the stock, before they can advance the prices, and maintain them for any length of time. Have no idea what their plans are. It is hard to place orders at the extreme low prices prevailing in November, when the demand was greater than any month in the year. The consumption is very small just now, and if the price is advanced very much, the manufacturers will have to carry the stock; the jobbers will not take the risk."

PLATE.—A dispatch from Pittsburg states that the plate glass manufacturers have formed their combination, which is capitalized at $20,000,000, and have advanced prices 20 per cent. The trade here has no confirmation of this report, except as to the advance, and is disposed to question the accuracy of the statement concerning the forming of a combination. A Chicago correspondent writes, informing us of the advance, and says there is very little doubt that the manufacturers will consolidate in order to control production and prices.

Lead in 1894.

The lead industry had greatly to suffer throughout the year under all sorts of adverse influences. At the very beginning of the year a hostile legislation brought prices down to an unnaturally low level, from which they only recovered on a few occasions, which were, however, of short duration. With the lower silver values which were again established during different periods of the year, the Western producers had very hard times indeed, and only a few favored ones were able to make both ends meet. Early in January reports came to hand to the effect that the Senate Committee intended to change the Wilson bill in such a way as to cut the existing duties in halves, and during the long period that the Tariff bill was under discussion in the Senate, this threat alone was sufficient to anticipate the hostile legislation. Although the elections of 1892 were fought out on the principle of raw material, the new Tariff bill showed very little of this sound principle, but rather the contrary, and lead is one of the instances which can be cited as an example.

Lead ores are now taxed with a duty of 2-4c. per pound of material, and, as lead ores which are imported from foreign countries very seldom carry more than about from 30 to 40 per cent. of lead, it will be seen that they are taxed twice or thrice as heavy as pig lead or lead bullion.

A distinction is made between lead ore and silver ore carrying lead, and in the latter case the lead contents are subject to a duty of 3-4c. per pound on the lead contained therein; but even this duty is comparatively too high with the duty of 1c. on pig lead, if the losses in smelting, extra freight, etc., are taken into consideration. If this legislative body had intended to drive the lead industry more and more into Mexico they could not have adopted better methods.

Manufacturers of white lead, sheet lead and pipes are hardly much better off than smelters or refiners, being protected only by a duty of 1 1-2c., and the very moment when pig lead can be advantageously imported from Europe to this country, European manufacturers will be able to bring over the manufactured goods to the detriment of our home industries. In consequence of this it is not at all astonishing that the production of silver lead ores shows a very decided falling off, and the probability is that this will not change materially during the present year. The only increase in production which we are able to report is in Missouri, where straight lead ores are mined, and where great economies have been inaugurated during the last few years in the smelting and refining. Although this industry is also seriously interfered with by the lower prices, operations can still be conducted at a moderate profit, and the probabilities are that the output will still further increase.

In consequence of the continual depression, and owing to which all industries had more or less to suffer, the consumption of lead during the past year was not as large as during the few preceding years. At any rate, the falling off in production was so great that a certain quantity of pig lead had to be imported, and in all nearly 10,000 tons have been received from Europe; besides, certain quantities of the Mexican bullion, which is being refined in this country, were retained here after the duty was paid, and as matters stand now, the probability is that henceforth a larger proportion will be used in the same way. Necessarily, for each pound of lead so retained here, a pound of Western lead is replaced.

The Eastern markets being thus to a certain extent cut off for Western producers, and the Middle States not being able to take the entire quantity, it will in future be a close fight between the two products, from which the price of the metal must suffer.

By a ruling of the Treasury, 10 per cent. of the bullion received from Mexico and refined in this country could heretofore be retained here as exempt lead; less the losses in refining, which range from 2½ to 4 per cent.; or, in other words, a quantity of about 3,000 tons of lead was kept for home consumption, while the balance, or nearly all of it, was exported. This ruling was changed early in December, and the owners of the Mexican bullion at once found it to their advantage to keep all their lead here, and this immediately affected prices adversely, which thus arrived at a lower level than ever be-

fore in the history of this metal in this country.

In January, prices opened at 3.20, but the market shortly grew firmer. and by the middle of February 3.40 was reached, at which time there were rumors afloat that the duty on lead would be reduced, and this was sufficient to at once bring the market down to 3.25. This lower range of prices made producers reluctant sellers, and accentuated a slight firmness, but it was not until the end of March, with the beginning of Spring, that a larger demand set in, and 3.50 was touched, and for two months the quotation from 3.40 to 3.50 could be fairly well maintained.

Early in June the Senate decided to reduce the duty to 1c., which strengthened the foreign markets and lowered our own, and prices quickly fell to 3¼, at which figure quite considerable transactions took place, in fact, so large that a natural reaction upward set in, and prices advanced to 3.35, which values were maintained until the end of July. At this time it became very doubtful that the Tariff bill would become a law, and, naturally, this at once affected lead most materially. Prices went up to 3.60, with hardly any sellers thereat, and if the Tariff bill had been defeated the old quotation of 4c. would have been reached in a very short time. So all eyes were centred on Washington, as, naturally, the moment the duty was reduced, foreign lead could be laid down here at about 3¼.

Thus, during the month of August, when a compromise between the two houses seemed possible, prices eased off, and when the bill became a law, prices at once dropped down to the importation point, viz., 3.20 and 3.25. In the mean time some importations of foreign lead had been made, which were understood would be used in case the Tariff bill did not become a law, and, if so, to be again exported and drawbacks collected, but as this lead was purchased at the lowest possible price, it became available for the home market at 1c. duty. This depressed the market, which then came down to 3⅛ and 3.15, where it remained, with some slight variations, until the beginning of December, when the ruling hereinbefore mentioned became a law, and prices dropped down to 3.02½ and 3.05, at which we close. We may fairly expect a better consumption during the next year, but no hopes of a material rise can be entertained, as the foreign material will always be a menace.—Engineering and Mining Journal.

Annual Meeting of the Drug Trade Section.

Mr. Thomas F. Main of Tarrant & Co., chairman of the Drug Trade Section of the New York Board of Trade and Transportation, has appointed the following committee, to make arrangements for a luncheon, to be served at the annual meeting of the section, which occurs Jan. 17: Mr. Thomas P. Cook of the New York Quinine and Chemical Co., chairman; Mr. B. T. Fairchild of Fairchild, Bros. & Foster, and Alfred Henry Mason, Esq., F. C. S., F. R. M. S., of Seabury & Johnson, who is also chairman of the lately organized New York Section of the Society of Chemical Industry.

Mr. John Clay of Parke, Davis & Co. has been elected a director of the Phoenix Bank.

OIL MARKET.

Note—*Our prices are for large lots except when otherwise specified, and buyers of small quantities must expect to pay an advance on these figures.*
Complete prices current will be found on page 31.

SATURDAY EVENING, January 12, 1895.

General trade has been fair for the season and bears out the often-repeated assertion that stocks in distributers' hands are very light and that jobbers and dealers are forced into the market frequently by the most ordinary requirements of consumption. The tone of the market is steady on the whole, and few changes in prices have occurred within the week. Linseed oil has been somewhat unsettled, but has steadied up again as a result of information from the West. The cottonseed oil market has been about steady, but quiet. The animal oils show no important changes. Among the fish oils cod is firmer, while other kinds are dull and nominal. The mineral oils are unchanged, notwithstanding the cosiderable advance in crude.

Vegetable Oils.

LINSEED.—The market has been somewhat unsettled by advices of a decline to 51c. in the West, made early in the week, and reports that sales of Western oil have been made in Philadelphia and other parts of Pennsylvania in single car lots at 52c.@53c. It was rumored that some sales of city had been made at 54c., but the local crushers did not officially change their quotation. There was a decided change in the situation yesterday, when word was received from Chicago that the price in the West had been put back to 54c. as a result of a conference between the principal Western crushers and the so-called independents west of and including Buffalo. Seed has been steadily advancing in Chicago during the past few days, and this, too, it is said, has had an influence in restoring the tone of the market. Argentine seed is offered here in bond at $1.03@$1.04 c. i. f., but we have heard of no sales so far.

COTTONSEED.—The week opened dull and continued so until Wednesday, when a fair business was done in choice grades of white oil for export. There was also more inquiry from Germany for a good grade of summer yellow, and several lots of choice oil were taken at 30c and of butter grades at 30½@31c. France has also been in the market for off grades of yellow at 28c, but could not obtain much under 28½c. The local lard refiners have received bids of 28c for off grades of yellow, but would only release small lots at 28¼@28½c. They have also been free buyers of crude at 24c here, at which they have picked up considerable stock, but at the close they were unable to obtain further supplies that would make a good grade of white oil, under 24½@25c as to test and quality. Early in the week there were several single tanks of prime crude offered from various sections of the South at 20c loose, but those who wanted oil merely used these offerings in hopes that they would be able to draw out larger supplies. The mills soon "got on to this" and either withdrew their offerings or raised the price, so that at the close 21@22c loose, as to location, was generally asked, with 21@21½c bid, according to section and freight rate. For the first time in weeks oil is going into warehouse when it cannot be sold at full prices, and yet these accumulations are not large, as the receipts of unsold oil continue light, and will likely remain so until the mills accumulate a larger stock of oil and are in need of money. It is claimed that the average outturn of cake each year is about 300,000 tons, but this year it will be exceeded by about 50,000 tons. At the moment there is almost no export demand, with only a slight home consumption, even though prices quoted seem abnormally low, the range being from $11@$12 per short ton, though some mills decline to shade $16 per long ton f o b. The sales of oil for the week comprise 75 bbls crude at 24½c, 100 bbls do at 24c, 1,400 bbls crude in lots, at 24@24½c, 100 bbls do at 24c, 200 bbls off crude at 23½c, 1 tank prime crude at 20c, loose; 2 tanks do at 20½c, 3 tanks do at 21c, 1 tank do at 21½c, loose, as to location of mills; 100 bbls prime summer yellow at 30½c, 150 bbls do at 29½c, 250 bbls choice yellow at 31c, 300 bbls prime yellow at 30c, 250 bbls do at 29c, 200 bbls do at 29c, 3,000 bbls, in lots, at 29@29½c, 1,500 bbls do, in lots, at 30c, 500 bbls butter oil at 30½c, 300 bbls butter oil at 31c; 150 bbls do at 31c; 300 bbls choice white oil, for export, at 33c; 250 bbls do at 33c; 250 bbls do at 33c; 100 bbls do at 32c; 300 bbls red oil, for export, at 27¾c; 200 bbls off yellow at 28c, and 250 bbls do at 27¾c; Messrs. Chas. B. Taintor & Bro. in their circular say: "There is not much of intarest to report on a very dull but steady market throughout the week. Exporters' views are still under quotations, although there has been some business done in white oil at nearly market rates, and other inquiries for same grade are in hand Prime crude, loose, f. o. b. mills, is stil trading at an average of 20c, and the West is a very indifferent buyer, having apparently contracted for immediate as well as moderate future wants. Choice crude testing under 1 per cent free fatty acid would be probably taken at 21c loose, of bmill, by this market, but can only be placed on sample guaranteed. Lard has been steady and showing some slight upward tendency, but without much doing and tallow is slow of sale. As said sometime since, it appears that lowest prices have been seen, but a dragging market may continue until supplies show some evidence of exhaustion. Receipts at this port for the week are 8,626 bbls."

about 600 tons of the oil, held by parties who made advances upon it, may come on the market for resale. For lots on way they are asking 5¼c., while for later shipments they are quoting 5½c. The demand, however, is slack at the moment.

COCHIN.—Trading in this article is so light that it is almost impossible to say just what the market is. For small jobbing parcels they are asking 6@6¼c., as to quantity and holder, while for late arrival, 5¾c. is nominally quoted.

OLIVE.—The demand is light, either for spot or nearby parcels, with sales reported of 60 barrels at 55@57c., as to quality and quantity. Shipments are only wanted in a limited way, with sales reported of 100 barrels at 54@55c., as to quantity and date of shipment. Olive foots are held firm on the spot at 5¼c., and at 5c. for future delivery. There are some outside lots which are purchaseable at a shade less.

Animal and Fish Oils.

COD—The market is much firmer on Newfoundland, in view of the fact that the supply is nearly exhausted and that in consequence of the great financial stringency existing in that country, few, if any, boats will be fitted out during the coming season. Holders here are demanding 33c. Domestic, in sympathy, is firmer, and we hear of none offering below 30c.

DEGRAS—The consuming demand is good, though there are few orders for larger lots than carloads. The market is very firm, but prices have not further changed, the quotations being 2@2¼c. for German, 2½@2¾c. for English and 6@6¼c. for French, with French wool grease nominally at 2¼@2½c.

LARD—Little business has been done since our last in prime oil, and that almost wholly in a jobbing way at 55@56c. The off grades have sold to a fair extent for immediate use at the former quotations of 50@52c. for a grade close to prime, 45@48c. for extra No. 1, 40@43c. for No. 1, and 35@37c. for No. 2, as to seller, quality and quantity.

MENHADEN—With no crude oil in first hands, that article is entirely featureless. For the manufactured oils there is a moderate jobbing demand and prices are firmly maintained.

NEATSFOOT—There is quite an active export demand for white oil at full prices, but the home demand for all grades is only moderate. While the tone of the market is firm, there has been no change in quotations.

RED—Saponified continues in fair jobbing demand, and prices are steady at 4⅝@4¾c., as to quantity. Elaine is quiet and unchanged.

TALLOW—In a jobbing way trade has been fair during the week, but the market presents no features of general interest. Prices are steady and unchanged at 45@55c., as to quality and quantity.

Mineral Oils.

There have been no fresh developments in the market for the mineral lubricants since the date of our last report, notwithstanding the further advance in crude, which has once more reached the dollar mark. Buyers seem to look for an advance in the products and have shown a disposition to buy more freely, though they are not inclined to anticipate actual requirements. Those in a position to be best informed say there is no immediate prospect of an advance in prices for the lubricants.

BLACK—The medium cold tests are receiving a fair amount of attention, and there is more interest shown by buyers in zero oil, but, on the whole, business is only moderate. Prices have not changed.

CYLINDER STOCKS—The jobbing demand is quite brisk, but there is little or no call for large lots, and quotations remain as heretofore.

FILTERED—Consumers' wants, while not urgent, induce them to buy quite freely in a jobbing way. The market, however, presents no particularly new features.

PARAFFINES—There is about the ordinary amount of business for the season going on in these oils, and they are held up to previous quotations, outside manufacturers not being in a position, apparently, to cut prices at present.

Oil Cake.

The market remains very quiet, and prices are entirely nominal at $20.75@$21.

Wax, Lard, Tallow, Etc.

PARAFFINE WAX.—There have been no fresh developments in this market. Trade is quiet, and prices unchanged.

LARD.—The market shows an irregular tone and closes a little higher than at the same time a week ago, the quotations being $7.15 for Western, and 6⅝c. for city.

STEARINE.—There is a steady feeling as the production is closely sold up, but there is no present demand. Closing quotations were 7c. for oleo, and 8¾c.@8⅞c. for city lard.

TALLOW.—The tone was irregular, closing at 4 11-16c. for city and 5c. for Australian.

Chicago Oil Market.

(Special to the Reporter.)

LINSEED OIL.—Possibly because of an urgent desire to sell, induced by a dullness which seemed to be growing chronic, linseed oil has suffered a decline. To-day's market is quotable at about 51c., the season having apparently reached that period not infrequently described as "between hay and grass."

FLAXSEED.—The week under review has been an exceedingly quiet one, as regards alike movement, arrivals and withdrawals. According to official postings, receipts have fallen off more than 30, and shipments more than 50 per cent. Comparative figures are given in the appended tabular statement:

Week ending	Receipts. 1894.	Receipts. 1893.	Shipments. 1894.	Shipments. 1893.
Jan. 9...	41,081	91,245	15,672	35,795
Jan. 2...	64,237	113,516	28,196	62,191

The registrar of flaxseed reported a slight increase of stocks (4,173 bu.) at the beginning of the week. A summary of the bulletin is given below:

Grade.	Jan. 7, 1895.	Dec. 31, 1894.	Jan. 6, 1893.
No. 1.....	425,026	421,615	306,675
Rejected	—	—	5,297
No grade.. ..	609	609	609
Total reg...	425,635	422,224	312,581
Special bins...	762	—	—
Total..	426,397	422,224	312,581

Arrivals have been very light. The quality, however, has been somewhat better. There have been 57 cars inspected in, of which 35 graded as No. 1 and 22 as rejected. The total quantity of seed inspected out has been 7,156 bu., of which 5,040 were classed as being of contract grade and 2,146 as rejected. The week has been characterized by extreme quietude in both the cash and speculative markets. The only future delivery which attracted the least attention was the May option, of which 2,000 bu. changed hands at $1.43 to $1.43½. Toward the close of the week, however, there was noticeable a better inquiry for May flax, and $1.44 was bid without takers. In the cash market business has been exceedingly slow. The fluctuation in prices has been confined within a narrow range. Contract seed opened at about $1.38½, and after selling up to $1.40 (a single sale of extra choice flax commanding ½c. premium over the outside), fell off to $1.39, at which it was slow of sale toward the close yesterday. To-day's market was characterized by little interest on the part of either sellers or buyers. Transactions, so far as reported, were of little significance. There was a slight effort to trade in May seed, but it resulted in nothing. It was held at $1.45 and a small quantity was seemingly wanted, but the limits placed upon the buying orders prevented any actual transfer. No. 1 cash car lots were salable at $1.40; small lots were at a slight discount, a part of a car selling at $1.39½. Rejected, by sample, brought $1.36.

OIL CAKE.—A fairly good home demand is reported this week at $18 per ton net in this market. As to export trade, there is none, crushers holding their output at figures which are regarded as being entirely too high. A fair Western trade in meal has been carried on, the basis of prices being equivalent to about $19 at Chicago.

OLEO OIL.—Advices from Rotterdam are to the effect that the past week has been characterized by features decidedly unsatisfactory to melters. While the volume of business transacted has been considerably in excess of that of the previous week, having aggregated some 2,800 tcs., the best price obtainable has been 50 fl. Outside of a few sales on private terms, a good quality of medium oil has been obtainable at 40 fl., while some has been sold as low as 38 fl. The amount of oleo on hand in the Rotterdam market, available for sale, is estimated at about 18,000 tcs. Exports for the period under review were in the neighborhood of 3,300 tcs.

LARD OIL.—No improvement can be noted in this market. Extra oil commands 55c., Extra No. 1 is salable at 49c., No. 1 is freely offered at 38c. and No. 2 sells slowly at 3c. lower.

TALLOW OIL.—Owing to a decline in raw material, tallow oil has suffered a drop. To-day's quotations indicate more or less free offerings at about 45c.

The Price of Lard in Chicago.

The following table shows the range of prices of lard at Chicago during the past week:

Jan.	Cash.	Jan.	May
7...	6 90 @ —	6 87½@6 92½	7 00 @7 10
8...	6 92½@6 95	6 87½@6 92½	7 02½@7 10
9...	6 90 @6 97½	6 90 @ —	7 02½@7 10
10...	6 82½@6 85	6 87½@6 90	7 00 @7 10
11...	6 82½@6 85	6 82½@ —	6 97½@7 02½

St. Louis Market.

(Special to the Reporter.)

PIG LEAD.—The market has been very quiet. The demand was limited, and sellers had to make a concession. Soft Missouri and desilverized sold at $2.75, and chemical hard at $2.80. A better demand sprung up later in the week, and $2.82½ was bid freely for chemical, and Missouri soft could have sold at that. Receipts for the week were 7,510 pigs. The shipments were 7,741 pigs.

LEAD AND ZINC ORES.—The market has been a little more active, but prices remain the same, though very steady. The top for zinc ore is still $19.50 per ton, and lead $16 per 1,000 pounds. The total shipments of zinc ore were 4,582,750 pounds and 607,780 pounds of lead ore.

CASTOR OIL.—The demand is limited, and very little is changing hands. No. 1 is still 10c. and No. 3 8¾c. for car lots.

CASTOR BEANS.—There is a better demand, but the beans are scarce. The market is steady, and prime sell at $1.25 in round lots.

Duty on Cottonseed Oil in Germany.

Report by Consul De Kay.

I have the honor to notify you of a bill now before the Federal Council (Bundesrath) raising the duty on cottonseed oil from 4 to 10 marks (from 95.2 cents to $2.38). This appears to be only one of a number of efforts made by the landowning party (Agrarier) and the protectionist manufacturers to strike at any article of importation that can be used for food. Cottonseed oil, in its refined stage as table oil, as well as an ingredient of manufactured butter, is to be dealt a blow.

I submit the translation of a clipping from the Vossische Zeitung, which ranks among the more liberal newspapers here:—

The bill for a change in the customs tariff which has been proposed to the Federal Council (Bundesrath) is without doubt identical with the proposition made to the Imperial Diet (Reichstag) toward the close of the last sitting, but which did not pass.

Among the proposed increase of duties only the augmentation of that on cottonseed oil was really important, which fully met the demands of the protectionist oil manufacturers, and at the same time those of landowners (Agrarier).

The duty, which was then 4 marks (95.2 cents), is to be raised to 10 marks ($2.38). Cottonseed oil which is meant for use in soap factories is to be altered under official supervision (amtlich), and when thus changed the duty is to be put down to 3.50 marks (83.3 cents).

According to the existing tariff, cottonseed oil, linseed, palm nuts and copra enter free; palm and cocoa oil pay 2 marks (47.6 cents); linseed oil and cottonseed oil, 4 marks (95.2 cents); rape, poppy seed, sesamum oil and peanuts are subject to a duty of 2 marks (47.6 cents), but the oil extracted from these articles a duty of 10 marks ($2.38).

From now on cottonseed oil alone is to be subject to a high duty. Interested parties go a step further. They asked that at the same time the duty on oil bearing fruits, nuts and seeds should be entirely abolished. But the Federal Council did not agree to it.

The increase of duty on cottonseed oil rests on the following grounds: Its employment for food purposes has risen from 64,464 double hundredweights (142,000 pounds) in 1885 to 273,823 double hundredweights (over 600,000 pounds) in 1893. By means of perfected methods of refinement people are able, so it is claimed, to make a fine table oil from cottonseed oil, which is especially used for the making of artificial butter, whereto its large proportion of "palmitine" particularly adapts it, as well for the preserving of fish.

That means that cottonseed oil is the culprit, but the sufferer is oleomargarine.

As long ago as 1890 the Federal Council rejected a resolution passed by the Imperial Diet in 1887 relating to the raising or changing of the duties for seeds and oils in question, changes in sympathy with the rise in duty on grains. The Federal Council did so because, in accordance with facts established by examination, the occasion was not propitious for proposals looking to an exhaustive remodeling of the tariff paragraphs in question, and with regard to the question whether certain special alterations might be pointed out, because the decision as to them must be postponed until a new revision of the tariff.

Since that time the grain duties have been lowered again. Nevertheless, the Government proposes a rise in (the duty on) cottonseed oil.

Under these conditions it is much to be feared that the landowners (Agrarier) and the industrial protectionists will labor together in order to put through a rise in the duty. That means a serious increase in the cost of materials for the oleomargarine factories, since hitherto it has been possible in America, it is true, but not in Germany, to produce a fine table oil out of cottonseed oil.

In a report to the Department under date of Nov. 17, Consul Merritt of Barmen, recites the same facts as those given by Consul-General De Kay, and adds:

I had hoped to be able to report that there was a sincere desire on the part of the German people to join with the people of the United States in a mutual effort for the extension of the commerce of both countries. The foregoing, together with the recent edict against American beef, would indicate, to a certain extent, a different attitude in this country toward the enlargement of sales of American products.

(Special Correspondence to the Reporter.)

The Olive Crop of Spain.

Washington, Jan. 11, 1895.

United States Consul Adams of Cadiz, Spain, in a report to the State Department in regard to the olive crop of 1894, shipments of which to the United States has now begun, says:

"The bulk of the olive crop of Spain is produced in the two provinces of Seville and Cordova, both of which are embraced in the Cadiz consular district, and reports received from leading shippers in both provinces indicate a considerable shortage in this year's yield as compared with that of the preceding year. The shortage is more marked in the province of Seville, where the spring drouth was more severely felt than in Cordova. According to some estimates, the decrease will amount to as much as 50 per cent. of the average yield, but this is evidently an exaggeration.

"Twenty-five per cent. would be a more reasonable estimate, which would indicate a total yield for the province of 75,000 fanegas (nearly 150,000 American bushels), the crop of 1893 having reached a total of about 100,000 fanegas. The olives grown in this province, though smaller than in the Italian olives, are very superior in flavor and quality, and are generally conceded to be better for the table, and in this connection it is proper to state that the exportation of the fruit from the port of Seville to the United States has grown enormously during the past ten years, aggregating a total value of $326,884 for the fiscal year ending June 30, 1894. The growth of the trade is due chiefly to the large increase in the foreign-born population of the United States and particularly in those elements of it that come from olive-growing countries. It is also due in a measure to the enlarged demand for edible olives among the wealthy class, who have acquired a taste for the fruit in their travels or residence abroad.

"Olives produced in the district of Cordova are mostly used for the manufacture of oil, a very small percentage of which is exported, the domestic demand keeping pace with the supply. The total export of olive oil from this district to the United States during the past fiscal year amounted to only $10,043. The trade, however, will probably assume much larger proportions in the future, unless other sources of supply are developed.

"The customs duty of 20 per cent. ad valorem imposed upon olives, green or prepared, by the tariff of 1894, will not, I think, cause any appreciable decrease in importations and will therefore result in a clear gain in revenue to the Government."

(Special Correspondence to the Reporter.)

Venezuela Petroleum.

Washington, Jan. 11, 1895.

The Bureau of the American Republics of the State Department has issued the following bulletin regarding Venezuelan petroleum:

"Recent advices from Caracas are to the effect that recent discoveries of petroleum in Venezuela are developing most favorably. An analysis of crude petroleum, taken from one of the wells lately discovered by Engineer Dacowitch, assays as follows:

	Per cent.
Ether, gasoline, naphtha..	12.5
Benzine....	3.5
Kerosene.....	48
Lubricating oil.....	27
Residuum.....	9

"This well at present yields a daily output of 4,000 gallons, and it is believed a much larger yield will be obtained when it is sunk to lower petroleum-bearing strata."

Recent Patents.

531,973. NITROSAMIN COMPOUND. Filed July 30, 1894. Patented in France Nov. 13, 1893. Issued Jan. 1, 1895.

Claim.—1. The process for the manufacture of the nitrosamins of the primary amins by treating the diazo-compounds hereinbefore defined, such as diazo nitro anilin, for example, with a caustic alkali.

2. As new articles of manufacture, the new class of bodies which are chemically the nitrosamins of the primary amins and can be derived from

the diazo-compounds thereof, and which in the form of sodium salt are soluble in water with somewhat alkaline reaction, and produce no azo-dye in the presence of beta-naphtholate of sodium and alkali, but on treatment with an excess of acid are converted into the corresponding diazo-compound, which yields coloring matter on combination with beta-naphtholate of sodium.

3. As a new article of manufacture, the specific para-nitro-phenyl-nitrosamin, which can be derived from the diazo-compound of para-nitro-anilin, and which occurs as a yellowish paste or powder and in the form of sodium salt is readily soluble in water, and on treatment with one equivalent of an acid is converted into free nitrosamin, but with an excess of acid, especially in the presnce of trace of nitrous acid into the corresponding diazo-compound, and which on treatment with methyl iodid is converted into nitrosamin of para-nitro-monomethyl-anilin.

TRADE ITEMS.

Mr. Robert Burnett, of Joseph Burnett & Co., of Boston, was on Friday appointed by the Court as assignee for Paul M. Swain. All sorts of amounts are stated as liabilities, but nothing definite will be known until the assignee makes a statement.

The annual meeting of the United States Menhaden Oil and Guano Association will be held in this city on Wednesday. As considerable business of importance is to be discussed, it is expected that sessions will also he held on Thursday.

The United States Court of Appeals last Friday took up the appeal of the Whiskey Trust from the decision of Judge Grosscup, awarding $37,000 of rebates to the Gottschalk Company of Baltimore. The issue that is made strikes at the foundation of the Trust. The Gottschalk Company was a distributer of the Trust, and had a claim for over $30,000 of rebates. The company refused to fill out the form required and was refused the payment of the rebates. Suit for its collection was begun, and in April last Judge Grosscup rendered against the Trust for $37,112.

The Davis Oil Co., of which Mr. Chas. W. Hand is manager and Mr. Henry S. Hand is treasurer, have moved their office from the Produce Exchange to their works, at 101-113 Ninth street, Brooklyn, on the Gowanus Canal. The Messrs. Hand are both members of the Produce Exchange, and will be on the floor daily. In removing their office to their factory it is believed advantages will accrue both to themselves and their customers. There appears now to be a move on the part of manufacturers to bring the executive department of their business in as close touch as possible with the manufacturing department. This is a custom which prevails in most of the old countries.

NAVAL STORES.

Note—*Our prices are for large lots except when otherwise specified, and buyers of small quantities must expect to pay an advance on these figures.*

Complete prices current will be found on page 31.

SATURDAY EVENING, January 12, 1895.

SPIRITS TURPENTINE.—Notwithstanding the easier tone of southern advices during the past few days this market remains fairly steady. The scarcity of machine barrels is still apparent in the wide difference in the quoted prices for these and southerns. Little business has been done here during the week, and at the close prices were nominal at 27¾c for southern, and 28¼@28½c for machine barrels.

ROSIN.—The market has remained very quiet during the week, and there have been no developments of an interesting character either here or at the South. The closing quotations were as follows: Common at $1 35; good strained, $1 37@1 40; E, $1 45; F, $1 50; G, $1 65; H, $1 90, I, $2 30@2 35; K, $2 65. M, $3; N, 3 05; W. G, $3 30; W. W., $3 50.

TAR AND PITCH.—There has been little or no demand for either of these articles, and prices are more or less nominal at $1 90@2 for tar, and $1 50@1 60 for pitch.

The statistical position of naval stores in New York for week ending Jan. 12, 1895, as given by Messrs. George L. Hammond & Co., was as follows:

	Rosin. Bbls.	Turpentine. Bbls	Tar. Bbls
Stocks reported Jan. 4, 1895	28,356	1,781	2,876
Receipts	7,392	2,026	199
Deliveries	4,036	1,095	144
Stock in yard Jan. 4, 1895	31,712	2,711	2,931
Transfers	550	22	290

SAVANNAH, Ga., Jan. 11 (Closing).—Spirits turpentine steady at 26c: sales 396 bbls. Rosin firm at $1 05.

CHARLESTON, S. C., Jan. 11.—Turpentine firm at 25c; receipts 3 casks. Rosin—Good strained firm at $1@1 05; receipts 123 bbls.

WILMINGTON, N. C., Jan. 11 (Closing).—Rosin firm; strained, 97½c; good strained, $1 05½. Spirits turpentine firm at 25c bid. Tar steaby at 95c. Crude turpentine steady; hard, $1 10; soft, $1 50; virgin, $1 70.

WANTS.

SPECIALS OR NOTICES *in this column are at the rate of Two Dollars for each insertion—for eight lines or less. At over eight lines Twenty-five cents per line of about six words. The full amount in cash must accompany all orders*

AGENCY WANTED

For the sale of bricks, lime, terra cotta, or other builders' materials, by a man whose entire time is devoted to the building interests, and is in constant intercourse with the leading architects of Chicago. References ample. Address "INTERNATIONAL," 657 La Salle ave., Chicago, Ill.

SUGAR OF LEAD.

Chemist having superior process for manufacture of Sugar of Lead, guaranteeing 95 per cent yield, would like to meet manufacturer interested in this article. Address "CHEMIST," this paper.

WANTED

A first class salesman who is fully acquainted with the lamp-black trade. Answer, "X. Y. Z.," this paper.

WANTED

Two or three varnish salesmen, who must be of an energetic, pushing character; absolutely honest and sober, with all evidences of ability; with a house of over thirty years' standing, who manufacture a general line, but who want to push coach, railway and piano varnishes. Address, "VARNISH," Brooklyn, General Post Office

WANTED

A first class salesman visiting the paint grinders and dealers west and south of Pittsburgh, to sell a staple article in good demand; a profitable side line for the right man. Address, "EASTERN MANUFACTURER," care of this paper.

A PRACTICAL MAN

Having twenty years of experience in the management of paint works, and thoroughly understands each and every detail connected with the manufacturing of paints of every description, desires position as superintendent or forman of factory. Address, "L. M. B.," care of this paper.

A REWARD.

A reward or partnership will be given for any article, best, if in the chemical line, that can be manufactured successfully with a small capital Address, "CHEMIST 2," care of this paper.

Indiana window-glass manufacturers have entered into an agreement with other Western manufacturers to close all manufactories for thirty days, with the hope of stimulating prices and reducing the output.

NACEFAS.
GALVANIZED IRON.

SIZE. PRICE.
½ Gallon ..... per gross,
1 " ..... "
Separately Papered, One dozen in a crate.
The remarks upon the opposite page apply to this style, which is a variation to meet the demand for a heavier Can.
They are made of Galvanized Iron, body and bottom, with a Tin top.
All of the Tin in these Cans is of American manufacture, full weight charcoal grade; and being well coated, will last in use many years.
The Cans are all thoroughly tested and warranted tight.
This Can is especially adapted for use in printing offices, for storage of benzine (used in cleaning type), and fully meets the requirements of Insurance Companies in this regard.
We have been in the business of manufacturing Cans for twenty-one years; and if there has ever been anything produced, at any price, equalling the Nacefas, we have never seen or heard of it.

PETROLEUM MARKET.

SATURDAY NOON, January 12, 1895.

The long-looked-for goal has at length been reached and presumably the producers are happy. The market has gained in strength from day to day, the last field report showing that no important change in the field situation need be expected during the Winter months, and it needed only the additional stimulus of the very bullish pipe lines' statements to boost the figures up to a round hundred and bring out from its long-hidden recess the earnestly coveted dollar mark, the symbol of content and of prosperity of the producer. The home stretch was reached on Wednesday, and the goal was reached on the Oil City exchange yesterday, although the highest bid on the local exchange was 99½c., though late in the day there were no offers to sell under 100½c. It is also noticeable that while the sales have been few in number and small in extent the interest shown on the local exchange has been very pronounced, and the general opinion appears to prevail that an improvement in trading may be looked for. There has been considerable discussion of the situation and an unusual number of operators have been assembled about the bull ring. Now that the dollar mark has been reached there is a general belief that prices will continue to advance so long as present conditions of supply and demand prevail, but the higher prices will stimulate drilling operations and the results of these are uncertain but present threatening possibilities.

Following is given the opening, highest, lowest and closing figures for each day, in tabulated form for comparison:

	Opening.	Highest.	Lowest.	Closing.
Monday	98⅛	99	98⅛	99
Tuesday	98½	98½	98⅛	98⅛
Wednesday	99⅜	99⅜	99⅜	99⅜
Thursday	99⅜	99⅜	99⅜	99⅜
Friday	99⅛	99⅛	99⅛	99⅛
Saturday	99¾	99¾	99¾	99¾

The amount of daily sales and total for the week follow:

Monday	6,000
Tuesday	0,000
Wednesday	1,000
Thursday	0,000
Friday	0,000
Saturday	0,000
Total for the week	7,000

The clearances at the several exchanges were as follows:

	New York.	Oil City.
Monday	0,000	48,000
Tuesday	0,000	46,000
Wednesday	0,000	0,000
Thursday	0,000	20,000
Friday	0,000	0,000
Saturday	0,000	0,000
Total	0,000	114,000

Following is the range of prices of National Transit certificates during the corresponding week last year:

Jan. 8	— @79
" 9	— @79
" 10	— @79
" 11	— @79
" 12	— @79
" 13	— @79

Refined and Products.

The higher point reached in the speculative market has been reflected in a further marking up of the price of refined. This will probably have no effect on the demand for export, which has continued up to the average, dependent, as usual, upon the position of the fleet of bulk-carrying vessels. The engagements during the week have exceeded 200,000 bbls., nearly all for bulk shipment. For barreled the inquiry has been light. The price of barreled oil was on Tuesday advanced to 5.90c. for New York loading and to 5.85c. for Philadelphia loading. Bulk oil is also firm at 3.40c. here and at 3.35c. at Philadelphia. The principal foreign markets are steady. To-day's quotations by cable were: Antwerp, 12¾f.; Bremen, 4.90m.; London, 3⅞d., and Liverpool, 3⅞d. Freight rates are firm at 1s. 9d.@2s. hence to London, and 2@3s. to Continental ports, as to port and vessel. Home trade lots continue in active request, and are firm on the basis of 8@8¼c. for 150 deg. water white, and Western at 7⅞@8c.

Cases for export have been in active request, and sales of about 350,000 are reported. The price for plain tops has been advanced to 7.00c. Freight rates are firm. The nominal rates for large vessels are: For Java, 17@18c.; Japan, 18@19c.; Yokohama, 18½@19c.; Calcutta, 12½@13c.; Colombo, 14½@15c.; Rangoon, 13½@14c.; Singapore, 19@20c.; Hong Kong, 15½@16c.; Shanghai, 20@21c.; Amoy, 16½@17c.; Bombay, 15½@16c., and for Penang, 19@20c.

Crude for export has been in light request, and sales of about 25,000 bbls. are reported. Washington crude is nominally quoted at 6.00c. in barrels. Cases for export have been neglected, and no sales are reported.

Prime city naphtha has been advanced to 6.00c. For export only a few small sales are reported.

Western residuum is nominally quoted at 2⅜@2¾c. in bulk at seaboard. Barrels are quoted at 5@5¼c. Lime residuum is offered at 4¾@5c. in barrels.

CHARTERS FOR THE WEEK.

The total charters for refined in barrels and cases, crude in barrels and cases, naphtha, &c., during the week ending Jan. 11, and from January 1, were as follows.

	Week.	Year.	1894.
Refined, bbls	225,300	419,100	361,800
Refined, cases	356,000	557,000	665,000
Crude, bbls	28,800	48,600	40,100
Crude, cases	.....	.....	20,000
Naphtha, bbls	6,500	6,500	....
Residuum, bbls	.....	.....	....
Lubricating, bbls	.....	.....	24,750
Barrels, cde eq	504,922	899,923	838,847

CLEARANCES FOR THE WEEK.

During the week ending January 11, and since January 1, the clearances of petroleum, in gallons, from the port of New York were as follows:

	Week	Year	1894
Refined	10,664,349	17,617,180	17,976,790
Crude	....	.....	200,000
Naphtha	4,082	6,676	1,500
Residuum	.....	.....	.....

EXPORT STATISTICS.

The following table shows the total exports from the port of New York and from the United States reduced to crude equivalent, in gallons, for the week ending Jan. 11; also total shipments to date with comparisons with 1894:

From N. Y. for week ending Jan 11	14,219,132
Total from N. Y. from Jan. 1, 1895	23,489,573
Same period last year	24,168,919
Decrease	679,346
From U. S. for week ending Jan. 11	23,078,054
Total from U. . from Jan. 1, 1895	38,864,453
Same period last year	32,255,278
Increase	6,609,175

TOTAL EXPORTS FROM DIFFERENT PORTS.

	1895.	1894.
New York	23,489,573	24,168,919
Philadelphia	13,428,842	8,176,026
Baltimore	1,911,040	.....
Boston	27,399	3,333
San Francisco	7,599	7,000
Grand total	38,864,453	32,255,278

CAPACITY OF VESSELS LOADING.

The following table gives the capacity of the vessels loading petroleum at the ports of New York and Philadelphia on January 11:

	NEW YORK.		PHILADELPHIA

Peanut Oil.

The utilization of peanut oil in the manufacture of soap constitutes an important industry in Marseilles, some ingeniously operating machinery being used for the purpose. After being cleaned and shelled the nuts are made to fall into a triturating machine, consisting of a pair of cast-iron rollers, and after being coarsely ground the meal passes to another machine to be ground finer, and thence into a long hexagonal case forming a sieve, through which the fine meal passes, while the coarse is sent back to the rollers again. The meal is then pressed in what are termed "scourtins," made of horse hair, a pressure of 2,850 pounds to the square inch being exerted and left on for an hour, which suffices to extract all that can be obtained in the first yield; the meal now passes from the scourtins, is ground a second time, heated to a temperature of about 158 degrees Fahrenheit, and another pressing effected. If oil of a very fine quality is required, the nuts are crushed but once, the partially ground nuts yielding a smaller but finer product. The yield varies according to the quality of the nuts. Mozambique nuts produce about 50 per cent. in the first pressing, the value being from 70 to 95 francs per 100 kilos; the second pressing yields about 12 per cent., the value of which is from 45 to 50 francs per 100 kilos. It is stated that the quantity of nuts imported at Marseilles for this purpose in 1893 was more than 70,000,000 pounds.

Exports of Petroleum From New York.

INDUSTRIAL SECURITIES.

Trade, as a whole, is reported fair, but not as active as last week. The feeling is quite hopeful for an improved Spring trade, as it is generally believed that stocks in the hands of consumers and dealers are light. There have been enough facts made known to warrant a material rise in the price of wheat, but the response is feeble and the rise is not important. Cotton has been up a little during the week, but toward the close it is only a few points higher and about one-fifth of a cent above the lowest. Linseed oil, which had fallen in the West some three cents a gallon, has recovered all it lost, as the result of a conference between the makers west of Buffalo. The white lead corroders have held a four days' session here this week, but their doings have not been made public. Strikes have been threatened, but none of importance has been announced. Money on call has been easy, and the rate on the exchange is 1 per cent. Time money has been a little uncertain; bankers did not ask any advance in rate, but most of them said they were not loaning at the moment on account of the uncertain condition of the Government's finances and the action that might be taken to adjust them. The supply is full, as the latest bank statements indicate, and interior banks are still remitting funds to this center. Rates are 2 and 2½ per cent. for thirty to ninety days, 3 to 4 per cent. for long dates. Commercial paper is in only fair supply, with the demand equal. Rates are still 3 to 4 per cent. for best double names and 3½ to 4½ per cent. for best single names. Foreign exchange has been firm and well up to the shipping point, but less than 2½ millions has been sent out this week. The fact, however, that exchange is higher since the shipment was arranged for, would seem that the demand had not been supplied and shipments next week would be on a larger scale. Stocks have been dull during the week, but comparatively steady, with the pools marking up some of their specialties. Yesterday afternoon there was activity and quite a general rise, reported to be based on the announced resignation of the Secretary of the Treasury, an unusual reason for an upward movement. Generally death or resignation has the reverse effect. It is more likely that new vigor on the part of some clique had all to do with the short spurt.

Sugar stock has been moderately active, with some manipulation going on, but for what purpose is not yet apparent. One report is that insiders are trying to keep the price down, and another that an operator who has always been close with them, is trying to work it up. Foreign Governments protest against the discriminating duty. Annual meetings are held, no statement yet given out, but the price is higher than a week ago.

The fluctuations during the week have been from 86⅝ to 91, the lowest Monday and the highest Friday, closing to-day at 90 bid.

Lead stock has been dull and trades are often hours apart, with manipulation plainly apparent, and appearances seem to indicate that the pool had worked off some stock.

The fluctuations for the week have been from 36 to 37¼, the lowest on Monday and the highest Friday, closing to-day at 36⅝ bid

Cotton oil stock has ruled dull and without feature. Occasionally a trader advances the price on a matched order, but the price is steady. There has been nothing done in the preferred for days, two hundred offered at 68, one hundred wanted at 67.

The fluctuations during the week have been from 23 to 23⅛, the lowest on Tuesday and the highest Saturday, closing to-day 23⅛ bid.

Whiskey stock has been quite active, and though at times it has shown a tendency to react, the price has been firm.

The fluctuations during the week have been from 9⅞ to 11⅛, the lowest on Thursday and the highest Friday, closing to-day at 10 1-2 bid.

Cordage stock has been quiet and not very firm in price. The report sent out has not as yet inspired confidence.

In the following table are given the closing quotations Friday night, and also the price realized at the last sale of inactive stocks- The market review is complete to Saturday night:

DRUG MARKET.

Note—*Our prices are for large lots except when otherwise specified, and buyers of small quantities must expect to pay an advance on these figures.*

Complete prices current will be found on page 31 and 32

SATURDAY EVENING January 12, 1895.

The general situation shows no change, and the orders from consumers are not over their immediate wants. The volume, however, is quite good in the aggregate.

ADVANCED.	DECLINED.
Cocoa Butter.	Opium.
Gum Chicle.	Alcohol.
Gum Tragacanth.	Cod Liver Oil.
Gum Kino.	Japan Wax.
Russian Hemp.	Menthol.
Serpentaria Texas.	Naphthalene.
	Juniper Berries.
	Anise Oil.
	Camphor.
	Canary Seed.

Opium.

There has been a gradual decline in the market the past week, influenced somewhat by lack of business and, to some extent, by lower cables from Smyrna and Constantinople, 8s 9d having been received. On Friday single cases were sold as low as $2 27½, but to-day $2 25 will buy. Jobbing lots are selling at $2 30 and powdered at $2 75@2 85.

Quinine.

The prevalence of grip has stimulated the demand for quinine somewhat, and many of the lots of old have been taken for consumption. The sales aggregate at least 75,000 ozs at 21½@22½c cash. At the close 23c is bid cash for any lots remaining, but no business has resulted. The situation is regarded as strong, though the jobbing figure still remains 23½@24c.

Miscellaneous.

ALCOHOL.—There is keen competition between the Trust and its "official" distributors, and $2 31 has been named for 10 bbl lots. Up to $2 32@2 34 is obtained, however, according to circumstances. We refer editorially to the situation. Our special Washington despatch, bearing date of to-day, furnishes the very latest on the free alcohol question.

ACETANILID.—Price remains at 31c.@33c., as to quantity, but there is a possibility that the increased demand for benzole may ultimately stiffen the market here.

BEESWAX.—The market is firmer, and 31¼c.@32c. is generally considered the range of values.

BORAX.—At the revised quotations there is a good, steady outlet to consumers, but no new features have yet come to the surface.

BRAZIL WAX.—The market is about bare of stock. A single bag of No. 3 sold at 33c.

CAFFEINE.—The market is almost without interest. Sales to arrive have been effected at $4.55 in 100 lb. lots, while on spot there is some inquiry.

COCOA BUTTER.—At the auction in Amsterdam on Tuesday the average price obtained was about 13d., while London advanced, buyers paying an average of 15d. English, therefore, is higher here, 35½c. being the open quotation, while Dutch is 32c.@33c. There is not a large supply of either.

COD LIVER OIL.—The market is a trifle easier, due primarily to the influence of a forced sale, which we alluded to two weeks ago, but directly to a sale of 100 bbls. in two lots, prime brand, supposed to have been at $27.50. The range is now $27.00@$29.00.

ERGOT.—In the absence of demand there is a little more desire in some quarters to sell stock.

IODINE.—The Chemist and Druggist of the 24th ult contained the following: "A report reached us from the Continent a few days ago hinting at an early reduction in the syndicate prices of iodides, and giving as a reason for the contemplated step that the members of the iodides ring found it impossible to cope with the offers of outside makers, so long as the present syndicate prices were maintained. We have made some inquiries concerning this matter, the outcome of which is that the English manufacturers deny having heard anything of an intended change in prices, while even the agents of the non-syndicated makers refuse to believe in a reduction."

JAPAN WAX.—More of a desire to dispose of goods has been apparent, and the sales and resales aggregate nearly 200 cases, the price showing a decline to 5¾c.@6c. Part sold from dock.

MENTHOL.—Under freer arrivals and low quotations to arrive, $4.35 will buy.

NAPHTHALINE.—Competition for the possession of the American market has reduced prices to 2½c. We refer editorially to the situation.

QUICKSILVER.—Can still be obtained in single flask lots at 48c., though up to 49c. is generally quoted. A sale of 250 flasks is reported.

SALICINE.—There has been some inquiry.

VANILLINE.—The price has been dropped to $5, owing to the expiration of the patent in this country.

Balsams.

COPAIBA.—Remains unchanged, but in good demand.

FIR.—There has been no change in the situation, but the market is easy.

PERU—Is quiet at $1.50@$1.55.

TOLU.—The first lot received in a long time has arrived, 20 cases, which is reported to have been sold. The price remains unchanged, but there is a firm feeling.

Beans.

TONKA.—Angosturas are in good demand from consumers, and we learned of a sale of 1,500 lbs., price not stated. First hands remain passive, and dealers show no inclination to take hold.

VANILLA.—Demand is excellent, and prices are hardening. Sales of 800 lbs. are reported from $6.50@$8.25. Further receipts of Tahiti variety from San Francisco are reported.

Berries.

JUNIPERS.—A fractional decline to 1⅞c. is reported for quantities.

Barks.

CASCARA SAGRADA.—A sale of 5 tons prime old is reported at 5c. For a lot of new crop just received 3¾c. was asked, ex dock, but 3½c. bid. The holders preferred to take it into store.

Essential Oils.

ANISE.—Arrivals have brought the spot price down to $1.85, and the market is easy.

CASSIA.—The market is now $1.10@$1.15.

PEPPERMINT.—There has been no change in the situation, but the market

Patent Improved Granite Stone Roller Mills

Also with Metal Rolls can be Heated or Cooled.

ESOPUS AND FRENCH BURR STONE MILLS

From 15 inches diameter to 36 inches diameter. Single and in gangs, water cooled or without water cooling.

Also Barrel Packers Pumps for all purposes, Gears, Shaftings, Single and Double Hangers, Pulleys Engines and Boilers.

AVOID IMITATORS OR INFRINGERS ON MY PATENTS

The proportions or dimensions of MILL are as follows: 20 inch DIA. OF STONES, 10 inch EYE, 3 inch TOTAL THICKNESS, 3 inch WEAR OF STONES. These dimensions assures a Perfect uniform wear, giving a good travel at the EYE and avoiding the annoyance of frequent dressing and when dressing is necessary a further avoidance of unnecessary labor to cut away superfluous stone. The above proportions are the result of many years of experience and experiment which no other mill can compare.

The stones are submerged directly into the water and cooling is NOT RE-DIRECT as in many MILLS which have failed in their purpose and by a special method of inserting the stone in the casings all danger of leakage is prevented.

The Gearing and initial Power is well provided, having a good margin over demands.

Are guaranteed to work perfectly at all manner of PAINT GRINDING from LEAD ZIINCS, &c &c., to TUBE COLORS or any manner of mixtures of Oil, Varnish, Japan, or Distemper.

In ordering state for what particular use. In stock for immediate shipment.

Size Pulleys 2 inches.
Speed " 75 to 100 Rev.
Weight of Mill Complete, 1,000 lbs.

is easy. For contracts, however, $2.10 has been bid and refused for cases.

Gums.

ARABICS.—The market is very firm, but prices have not changed. It is said that present quotations on the various picks are below the cost to import. We heard of a sale of 25 cases fourth at a private price.

CAMPHOR.—Manufacturers have reduced the price 1c.

GUM CHICLE.—As forshadowed in our last there has been a very radical advance and 35c is now bottom, with a very limited quantity obtainable at this. The stock in first hands is said not to exceed 250,000 lbs, while the sales aggregate fully 200,000 lbs at 28@31c. In Mexico a large American consumer has bought 90,000 lbs at 32½c laid down here.

KINO.—A sharp advance in London, which put the price to $3.00, caused an inquiry here for that market. The very limited stock on spot, however, induced holders to advance to $2.00.

SENEGAL.—The market is a fraction higher, in sympathy with Arabics.

TRAGACANTHS. — The medium grades of Aleppo are scarce here and in London, hence prices have radically advanced. All grades are higher, owing to the generally firm position abroad.

Herbs and Leaves.

DAMIANA.—Some of the lots just received had been sold previously. Further quantities offer to arrive at 8½c., though the spot price is 9½c.@10c.

LAUREL.—Sales in lots have been made at 3½c.

SENNAS.—Tinnevelly are advancing abroad, owing to the good demand.

Roots.

ALKANET.—There has been some inquiry, and about 10,000 lbs. sold at 5c.@5¼c.

GENTIAN.—Sales are being made daily at 3¼c.@3½c.

IPECAC.—Remains quiet, though firm.

JALAP.—In a regular way 25c. will buy.

SARSAPARILLA. — Arrivals have been very liberal, and there has been considerable inquiry for export, some of the lots having been sold previously. Holders generally want 6¾c., though there are lots still held at a limit of 8c. Dealers, however, are unwilling to pay over 6½c. The jobbing quotation is 7c.@7¼c.

SERPENTARIA.—Texas is scarce and held at 38c.

Seeds.

CANARY.—Is easier, 2¾c. now being the current quotation. To arrive less will buy. Spanish offers at 2⅞c.@3⅛c. To arrive, 1,200 bags were offered at 2.65c.

CORIANDER.—The price remains unchanged, though very liberal arrivals are reported.

HEMP.—Russian is firm at 2¼c.; 250 bags sold at 2 3-16c. early in the week.

MUSTARD.—The market is rather quiet, and prices are unchanged. A San Francisco advice states that 1,200 bags yellow sold at 2½c. f. o. b., but was subsequently rejected on the quality. It is stated, however, that the goods have been shipped to this city. The coast market is reported bare of Trieste brown.

RAPE.—The price for German is down to 2⅛c.@2¼c.

Spices.

There has been quite a brisk business in the general list, with particular activity in cloves, nutmegs and pepper. The first named is much firmer, and we note sales of 500 bales to arrive at 5 5-16c and 1,000 bales at 5 3-16c. Canton cassia is easier, as is also white pepper. There have been sales of several hundred tons of Singapore pepper at 4½c for January-March, February-April and March-May shipment. In nutmegs everything on the way, procurable at any price less than the present cost of importation—38¼ @ 38½c—has been taken up, and all the cheap spot lots have also been purchased. Reports from both of the principal primary markets state that the crop will be short; hence the advance. African ginger is quite scarce and in demand. Calcutta is a trifle lower, as is also Cochin. Zanzibar cloves are now quotable at 5½@6c.

Shellac.

Demand has been light from consumers, but there has been a little inquiry for goods just arrived, 125 cases T. N. having been taken at 25c. London and Calcutta are looking up a little. The latest arrivals turned out free, but they were nearly all T. N. and intermediate grades. D. C. has sold in single case lots at 50c, and 49c would probably buy one or two cases, bu 52c has also been paid.

Philadelphia Chemical Market.

ALKALI.—48 per cent is in fair demand, with prices firm on spot and for future deliveries. On spot 1 10 @ 1 20c will buy, and shipments are quoted at 1 05@1 10c: 58 per cent from store is held at 1 10@1 15c, and to arrive at 1@1 05c. These figures are also named for shipments.

CARBONATED SODA ASH—Is in limited supply, with a moderate demand noted. Spot goods are held at 1.15@1.20c and to arrive at 1.05@1.15c.

CAUSTIC SODA—Is quiet at the moment with 60% on spot held at 2¼@2 35c and to arrive at 2 15@2 20c. 74% from store can be bought at 2 15@2¼c, and to arrive and for shipments at 2@2 10c.

SAL SODA—Is in good supply with 67½@72½c named from dock. For shipments 65@70c will buy.

BLEACHING POWDER—On spot is quoted at 1 95@2 05c, with a fair business reported. For shipment 1¾@1 85c is named as to quantity.

NITRATE OF SODA—On spot can be had at 2 05@2 15c. Shipments are held at 1 85@1 90c, as to quantity and date of sailing, and might be shaded for round lots.

The Price of Chemical Fertilizers.

The agents of the Muriate of Potash Syndicate makes this statement:

"As it stands now the quotations are often misunderstood by your readers, and are damaging to us, inasmuch as the State chemists often base their valuations on the figures in your paper. They take the prices to be prices per ton, irrespective of the contents of potash, and are not aware that the prices are based on analyses of 48 per cent. for double manure salt, 80 per cent. for muriate of potash, and 90 per cent. for sulphate of potash, and that a proportionately higher price is charged for any potash over these figures. We also desire that attention be called to the fact that the prices quoted by you for 50 tons and upward are prices ex ship here for direct importation from the mines of Europe, and that much higher prices are charged for goods sold ex store here."

Quinine Bark Sales in 1895.

The dates at which public sales of cinchona bark will be held in the London and Amsterdam markets during the present year have been announced as follows: In London—Jan. 8, Feb. 19, March 19, April 30, May 28, June 25, July 23, Aug. 20, Sept. 17, Oct. 15, Nov. 12, Dec. 10. In Amsterdam—Jan. 24, Feb. 28, April 4, May 9, June 13, July 18, Aug. 29, Oct. 3, Nov. 7, Dec. 12.

A Firm of Swindlers.

William Sampson & Co., 15 Dey street, this city, have come to grief. A sheriff's notice adorns the door of their "premises." They have been operating extensively for some time as many medicine proprietors and manufacturing chemists know to their sorrow. Their modus operandi was to write for quotations, using a very artistic note-head, with their signature printed in fac simile. Then the order followed, and, strange to relate, was invariably filled. Mr. "Sampson" has disappeared, but may turn up under another name somewhere else. Will the time ever come when the trade will cease to "taken in" by such swindlers as Sampson?

Latest Appraisers Decisions.

The following decisions, based upon previous rulings, were handed down by the Board of U. S. G'l Appraisers:

White Muffled Glass.

Heroy & Marrener vs. Collector at New York, as to the amount of duties chargeable on certain white muffled glass. The protest was sustained according to G. A. 2760.

Glass.

Heroy & Marrener vs. Collector at New York, as to the rate and amount of duties collectible on certain glass. Following G. A. 1539, the protest was overruled.

Salol.

Mallinckrodt Chemical Works vs. Collector at New York, as to the rate and amount of duties properly chargeable on certain salol. According to G. A. 2693, the claim that the merchandise in controversy is dutiable at 20 per cent. ad valorem under parag. 19, act of 1890, was sustained.

MANUFACTURERS OF EVERY PRODUCT OF PETROLEUM

Eclipse Lubricating Oil Company

LIMITED

OF FRANKLIN, PA.

MANUFACTURERS OF

Lubricating and Burning Oils of all Grades and Gravities and Cold Tests

ADAPTED TO THE WEATHER AND CLIMATE

We make 300 deg. test BURNING OIL A SPECIALTY. We have the largest Filtering capacity in the world, and turn out a very large amount of every grade of filtered petroleum. Our WOOL OIL STOCKS and NEUTRAL OILS are used the world over.

Also Manufacturers of the Celebrated

MATCHLESS VALVE and CYLINDER OIL

Warranted not to CORRODE the IRON or EAT the PACKING, and to make more mileage than tallow or lard, and which we sell only to Railroad Companies or through our authorized Agents. The Matchless Cylinder Oil cannot be bought of dealers. In use on 60 Railways.

Main Office, Franklin, Pa. **Refineries: Franklin, Pa., Olean, N. Y., Erie, Pa**

(Special Correspondence to the Reporter.)

Transportation Note.

At the Central Traffic Association meeting last Tuesday an agreement was reached regarding second-class rates in Ohio. The association lines have for some time past endeavored to eliminate these rates entirely. This could not be done altogether, but it was agreed to confine second-class rates to the old territory.

Recent Patent.

531,969. PAINT COMPOUND. Filed July 5, 1894. Issued Jan. 1, 1895.

Claim.—1. A paint or coating compound, consisting of coal-tar, resin, plaster of paris, alum, borax, asphalt and liquid storax or styrax combined substantially in the proportions specified.

(Special Correspondence to the Reporter.)

Transportation Note.

At the Central Traffic Association meeting last Tuesday an agreement was reached regarding second-class rates in Ohio. The association lines have for some time past endeavored to eliminate these rates entirely. This could not be done altogether, but it was agreed to confine second-class rates to the old territory.

Recent Patent.

531,969. PAINT COMPOUND. Filed July 5, 1894. Issued Jan. 1, 1895.

Claim.—1. A paint or coating compound, consisting of coal-tar, resin, plaster of paris, alum, borax, asphalt and liquid storax or styrax combined substantially in the proportions specified.
